

ACCEPTED  
with COMMENTS  
in EPA Letter Dated:

DEC 6 1982

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.

6175-19

**OTOCIDE**

**INDICATIONS:** For the treatment of ear mites in Dogs, Cats, and Rabbits.  
**NOT FOR USE IN ANIMALS INTENDED FOR FOOD**

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. While firmly holding pet, fill each ear canal one-half full with OTOCID, and massage base of ear to insure that insecticidal action of OTOCID penetrates ear wax. Repeat treatment every other day until condition is relieved. Improvement is usually noted after two applications.

**DIAGNOSIS:** Ear mites usually induce the formation of a dry, dark brown, waxy exudate with crusts in the ears of Dogs, Cats, and Rabbits. Ear Mites may be detected by placing some of the ear exudate on a dark surface and carefully watching for the movement of tiny white specks away from the exudate. Inflamed, watery, or blocked ear canals indicate a more serious condition which requires the services of a veterinarian.
