INSECTICIDE**

**Concentrated  
INSECTICIDE**

A concentrated spray for the control of flies, roaches,  
ants, mosquitos, gnats, and exposed stages of silver-  
fish.

For best results close doors and windows of infested area and fill with mist. The space should be left closed for at least 10 minutes after treatment. For flying insects spray towards ceiling and center of room. For crawling insects spray into cracks and crevices. It is frequently desirable to sweep up and destroy fallen insects at the close of 10-minute period. For ants, treat ant trails and area where pests enter premises such as window sills and door frames. For silverfish, treat storage areas.
