

6736-30

HERBICIDE II

For general weed control in non-crop areas such as along sidewalks, driveways and railroad sidings. Can also be used around buildings, parking lots, fence rows and industrial plant sites. Use at a 1 to 3 dilution with water and apply with sprayer or sprinkling can. For heavy lush growth, use at 1 to 5. Rain within 48 hours of application reduces effectiveness. Apply when weeds are young and actively growing.

For Poison Ivy, Poison Oak, and Poison Sumac, use 1 quart per gallon of water and apply with sprayer.

Caution — Spray drift can damage desirable plants.

ACTIVE INGREDIENTS:

Ammonium Sulfamate 50.0

INERT INGREDIENTS:

Equal to 5.3 pounds per gallon 50.0

WARNING: KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin and eyes. Do not take internally. Rinse container and discard in safe place when empty. Do not contaminate water used for irrigation or domestic purposes.
