RE: Application for Amendment dated May 25, 2011
Product Name: B-T-F Chlor Tab Disinfectant - Sanitizer
EPA Registration Number: 6198-13

Dear Mr. Landman:

The Agency has reviewed your application for amendment submitted in accordance with continuing registration under the Federal Insecticide Fungicide and Rodenticide Act (FIFRA), as amended, and determined the action acceptable with the following comments:

- Correct spelling of Utensils as marked;
- Insert "sealed" in front of tile as marked;
- Revise First Aid statement as follows:

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice;
- Insert "non-porous" between hard and surfaces in the headings as marked;
- The Limited Disinfecting Efficacy examples must be removed. Instead you must list Salmonella enterica (ATCC 10708);
- The General Disinfecting claims must list Salmonella enterica (ATCC 10708) Staphylococcus aureus (ATCC 6538).
- Delete the redundant "for" as marked.

In addition, the revised basic Confidential Statement of Formula (CSF) dated September 13, 2011 was reviewed and determined acceptable and supersedes all previous basic CSFs. A stamped copy of the conditionally accepted labeling is enclosed. Submit one copy of your final printed labeling before distributing or selling the product bearing the revised labeling. Should you have any questions or comments concerning this letter, please call Tom Luminello at (703) 308-8075.

Sincerely,
