EMULSIFIABLE REPELLENT FOR THE PREVENTION OF ROACH INFESTATION  
IN BOTTLE CASES AND CARTONS

FORMULATED FOR USE IN BOTTLING PLANTS AND BREWERIES

USDA Registration  
No. 6218-10

Active Ingredients		
2-Hydroxyethyl-N-octyl sulfide	4.04%	12.75%
Other related compounds	0.21%	
N-octyl bicycloheptene dicarboximide	8.50%	
Inert Ingredients		87.25%

ACCEPTED  
JUL 19 1967  
UNDER THE FEDERAL INSECTICIDE  
FUNGICIDE AND RODENTICIDE ACT  
FOR ECONOMIC POISON REGISTERED  
UNDER NO. 6218-10 SUBJECT  
TO ATTACHED COMMENTS.

WHEN DILUTED AND APPLIED TO BOTTLE CASES AND CARTONS, SprayTec REPELLENT CONCENTRATE WILL RESIDUALLY REPEL ROACHES. THIS WILL PREVENT INFESTATION OF CASES WHICH ARE TO BE RETURNED TO THE BOTTLING PLANT.

DIRECTIONS FOR USE

DILUTION DIRECTIONS

Dilute 1 part of SprayTec REPELLENT CONCENTRATE with 4 parts of water before applying to cases and cartons. A convenient amount to prepare is 1 gallon of CONCENTRATE to 4 gallons of water to produce 5 gallons of working solution. Stir into solution after diluting with water.

APPLICATION DIRECTIONS

Apply diluted SprayTec REPELLENT CONCENTRATE to the interior of cases and cartons prior to the placement of bottles in the cartons. For most uniform and economical application, the SprayTec CASE CONDITIONER is recommended.

It is recommended that this treatment be applied routinely to all cases and cartons on the bottling line regardless of the period of time which has elapsed since previous treatments.

CAUTION: KEEP OUT OF REACH OF CHILDREN! Avoid contamination of food. Undiluted concentrate may be irritating. Avoid contact with skin and eyes. Wash with plenty of water. If irritation persists, get medical attention.
