

**DANGER**

**ANTIDOTES:**

If swallowed: Give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Have victim lie down and keep quiet. Call a physician immediately!

If on skin: Wash immediately with soap and water.

Aronine and 2-PAM are antidotal.

**DANGER:**

ALWAYS WEAR A GAS MASK OR RESPIRATOR OF A TYPE PASSED BY THE U. S. DEPARTMENT OF AGRICULTURE FOR PROTECTION AGAINST DDVP INSECTICIDE. NATURAL RUBBER GLOVES IMPERVIOUS TO VAPONA INSECTICIDE SHOULD BE WORN. CLEAN PROTECTIVE CLOTHING SHOULD BE WORN DURING APPLICATION; WITH HEAD AND ALL SKIN SURFACES COVERED SO THAT NO BARE SKIN IS EXPOSED. WORKERS SHOULD NOT RE-OCCUPY TREATED AREAS UNTIL THEY HAVE BEEN COMPLETELY VENTILATED.

Poisonous by skin contact, inhalation, or swallowing! Rapidly absorbed through skin! Do not get in eyes, on skin, or on clothing. In case of contact, immediately remove all contaminated clothing and flush skin or eyes with plenty of water for at least 15 minutes. For eyes, get medical attention! Do not breathe fog. Wash thoroughly with soap and water after handling and before eating or smoking; change to clean clothing. Keep away from heat and open flame.

DO NOT RE-USE CONTAINER. DESTROY WHEN EMPTY. NOT FOR USE OR STORAGE IN OR AROUND THE HOME.

Seller's guarantee shall be limited to the terms of the label and, subject thereto, the buyer assumes any risk to persons or property arising out of use or handling, and accepts the product on these terms.

USDA REGISTRATION NO. 6218 31

## **DIRECTIONS FOR USE**

### **PREPARATION OF TOBACCO WAREHOUSE**

1. Close all windows, doors, and ventilators.
2. Take all precautions necessary to prevent unprotected persons from entering the treated area.

### **METHOD OF APPLICATION**

1. Calculate the area in cubic feet of the room to be treated.
2. Use one (1) fluid ounce of Summit TOBACCO WAREHOUSE FOGGING INSECTICIDE PER 1500 cubic feet of space.
3. Pour the exact amount of insecticide needed for the calculated area into the insecticide tank of the thermal fog generator.
4. Adjust the metering valve or orifice size in the insecticide line to produce a dry fog. Never apply a wet fog. A flow rate of 8 oz. per minute is recommended. (For the DYNA-FOG "70", use the No. 4 setting from the closed position of the insecticide metering valve.)
5. Walk down the center aisle of the room, directing the fog from side to side.
6. For best results, the warehouse should remain closed for at least 1 1/2 hours after fogging. It should then be completely ventilated for at least 1 hour before re-entering.
