DIRECTIONS FOR USE

STORAGE AND DISPOSAL

STORAGE: Keep container out of children's reach. Store in a cool, dry place.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Washes resulting from the use of this product may be disposed of only at an approved waste disposal facility.

CONTAINER DISPOSAL: Empty containers are reusable. They offer for recycling or recycling, or puncture and dispose of in a landfill site by other procedures approved by State and local authorities.

FOR TRUCK MOUNTED ULV SPRAYERS: The objective is to treat the area with .002 to .0025 pounds of pyrethrin and .010 to .0125 pounds of p. p. n. butoxide per acre.

Summit PYRETHRUM ULV INSECTICIDE is a ready-to-use formulation which should be applied without further dilution. Disperse fog at the following flow rates depending upon the speed at which the truck is moving.

Truck Speed Miles per hour	Flow Rate of Summit PYRETHRUM ULV Fluid Ounces per Minute
5	2 to 2.25 fluid ounces
10	4 to 4.5 fluid ounces

FOR LECO equipment, formulation pressure on machine should be set at 3 lbs. per square inch, and the discharge nozzle should be positioned approximately 30" above the horizontal off the side of the truck bed.

Delivery rate and traveling speeds can be varied slightly so long as the basic objective of .002 to .0025 pounds actual pyrethrins per acre is maintained. Use a swath width of 300 feet for acreage calculations.

Best results are obtained by application when there is a slight breeze of 5 miles per hour or less. Fog with the breeze so that the wind will carry fog from roads or paths into the area to be treated. Repeat applications as needed to obtain the desired reduction in adult mosquito population.

PYRETHRUM ULV INSECTICIDE

**Highly Concentrated,
Ready-To-Use Insecticide
For Use In Ultra Low Volume
Cold Aerosol Fog Generators
For Large Area, Outdoor,
Adult Mosquito Control**

ACTIVE INGREDIENTS:

- Pyrethrins
- *P. p. n. Butoxide Technical
- Mineral Oil

100%
5%
25%
70%

*Consists of 20% (butylcarbityl) (6-propylperonyl) ether and 5% other related compounds
†Special oil to produce optimum particle size for ULV application

CAUTION: KEEP OUT OF REACH OF CHILDREN.
See other cautions on side panel.

Summit PYRETHRUM ULV INSECTICIDE is formulated for use in cold aerosol fog generators, such as the LECO ULV, MODEL HD, which produce a fog having most of its particles in the 5 to 50 micron range.

This product may be used in mosquito adulticiding programs involving residential and recreational areas, swamps, marshes, overgrown waste areas, roadsides and pastures where adult mosquitoes are present in annoying numbers.
