

SUMMIT

Bti BRIQUETS

FLOATING SUSTAINED-RELEASE LARVICIDE
FOR LONG-TERM CONTROL OF MOSQUITO LARVAE

ACTIVE INGREDIENT: Bacillus thuringiensis Berliner var. israelensis,
Serotype H-14, Primary Powder, Potency of 7000
AA ITU (Aedes aegypti international toxic units)
per milligram. (Dry weight basis) 5.0%

INERT INGREDIENTS: 95.0%

ACCEPTED
with

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS

Hazards to Humans: Avoid contact with eyes or open wounds.

STORAGE AND DISPOSAL

Storage: Tightly close containers of unused briquets. Store in cool, dry, well-ventilated place.
Disposal: Do not re-use empty carton or packaging material. Perforate or crush and discard carton according to local trash disposal regulations and in a safe place.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Summit Bti BRIQUETS are formulated to release effective levels of Bti for a period of 30 days or more under typical environmental conditions. The floating action of the briquets will ensure that the active material is released at the surface as well as gradually settle to the bottom.

These briquets may be used in all types of mosquito breeding areas. In areas where excessive flushing action occurs, there is the possibility that the briquets could be washed out of the treatment site. To prevent this, the briquets can be anchored using a string tied through the hole in the center of the briquet.

Summit Bti BRIQUETS can also be used for pre-flood treatment. If the briquets are applied to dry areas which are known or suspected to become breeding sites when flooded, such as woodland pools and abandoned swimming pools, the briquets will float to the surface when flooding occurs and start releasing the active Bti material. Alternate wetting and drying will not reduce their effectiveness.

DIRECTIONS FOR USE (Continued)

APPLICATION RATES

Mosquito Larvae:

Flooded larvae breeding sites: Use one (1) Summit Bti BRIQUET for each 100 sq. ft. of surface area, regardless of the depth of the water. In water with a high organic content, such as sewage disposal systems or waste lagoons, the application rate may have to be increased to as much as four (4) times the normal dosage based upon evaluation by the user. If control is not obtained within 24 hours, an additional briquet or briquets should be applied.

Pre-flood treatment: Apply one (1) Summit Bti BRIQUET to each 100 sq. ft. of dry bed surface which is a known or suspected breeding site when flooded.

Minimum Net Contents - 2.87 lb. (1300 Grams) EPA Registration No. 6218-

Contains 100 Briquets
