Gentlemen:

Subject: Granular Chlorinating Concentrate
EPA Registration No. 6284-3
Your Amendment Dated July 16, 1990

This is in response to your request to amend this registration to include revisions in the precautionary statements and to change the product name.

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that you:

1. Make the following labeling revision before you release the product for shipment bearing the amended labeling:
 - Under "Maintenance Program" revise "... maintain a chlorine reading of 1 to 3 ppm" to read "... maintain a chlorine reading of 1.0 to 2.0 ppm."
2. Submit the revised final printed labeling for inclusion in the product file.

Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the edited labeling is enclosed for your records.

GRANULAR CHLORINATING CONCENTRATE

- . Bacteria and Algae Control
- . Quick Dissolving
- . Stabilized
- . Sun Protected
- . Long Lasting
- . 100% Soluble
- . Will Not Add Scale
- . Concentrated
- . For Swimming Pools

Precautionary Statements

DANGER

Hazards to Humans & Domestic Animals

Keep Out of Reach of Children

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. When handling, wear rubber gloves and goggles or face shield and use only thoroughly clean dry utensils. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Promptly drink large quantities of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol.

IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention.

IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IF INHALED: Remove person to fresh air. Get medical attention.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge into lakes, streams, ponds, or public waterways unless in accordance with a NPDES permit. For guidance, contact the regional office of the U.S. Environmental Protection Agency.

PHYSICAL OR CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT

Mix only into water. Use clean dry utensils. Do not add this product to any dispensing device containing the remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

5 of 6

(SIDE PANEL)
(6284-3)

These granules control bacteria and algae in swimming pools--Concentrated--Stabilized--100% Soluble.

Contain 63% available chlorine. This product is stabilized to protect against chlorine loss due to ultraviolet rays of the sun...dissolves quickly, leaves no calcium residue and provides continuous round-the-clock protection.

The amount of granules required for your pool will vary depending on chlorine demand and filter cycle. High temperatures, dust, rain and number of swimmers can increase chlorine requirements.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

POOL START-UP--INITIAL TREATMENT

When first filling your new pool or refilling with fresh water at any time:

1. Shock treat with this product as prescribed below to destroy harmful bacteria. Let chlorine level drop to 3 ppm before entering pool.
2. Bring pool water pH within a range of 7.2 to 7.6. Add dry acid to reduce pH or soda ash to increase pH as prescribed on labels.
3. Add water conditioner (cyanuric acid) as recommended on label.
4. Start maintenance program.

MAINTENANCE PROGRAM

Two ounces of this product will provide a chlorine residual of 1 ppm for each 10,000 gallons of water. Add enough granules to maintain a chlorine reading of 1 to 2 ppm. Chlorinating granules may be added directly to the surface of the pool water. Test the pH of the water with your test kit and maintain the pH of the water in a range of 7.2 to 7.6.

Test your pool water daily and make necessary adjustments with appropriate pool chemicals.

SHOCK TREAT

Shock your pool every two weeks, and after a rain or at the first sight of green or cloudy water. Extremes in temperature, swimmer loads, wind and dust can cause bacteria, algae and debris to accumulate in pool water and can require weekly shock treatment. To shock, add 20 ounces of this product per 10,000 gallons of pool water to bring chlorine level to a range of 10 ppm. Treat pool at night--do not allow swimmers to enter pool until chlorine level has dropped to 3 ppm.

STORAGE AND DISPOSAL

Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
