

CHLORINATED 1-INCH TABLETS

For effective bacteria and algae control maintain an available chlorine level of 1.0 to 2.0 ppm as determined by Chlorine Test Kit.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

POOL START-UP—

(CONDITIONING) INSTRUCTIONS

When first filling your new pool or refilling with fresh water at any time:

1. Super Chlorinate (shock treat) pool with Granular Chlorinating Concentrate as prescribed below, to burn out harmful bacteria.
2. Test pool water with Test Kit and bring pH in to 7.2-7.6 range. Add Dry Acid to reduce pH or Soda Ash to increase pH as prescribed on labels.
3. Add Water Conditioner as prescribed on label to protect chlorine against loss due to sunlight.

MAINTENANCE TABLET FEEDING PROGRAM FOR PROPERLY PRE-CONDITIONED POOLS

The number of tablets required for your pool will vary depending on temperature, wind, rain, pool usage and feeding method; float feeder or skimmer.

To start your tablet feeding program put 10 1-inch tablets in your feeder for every 10,000 gallons of pool water. TEST YOUR POOL FOR CHLORINE LEVEL DAILY. Add tablets as required to maintain an available chlorine level of 1 to 2 ppm. Do not throw tablets directly into pool—spotting will occur.

Maintain pH reading in a range from 7.2 to 7.6 on your test kit. Add Dry Acid or Soda Ash as prescribed on labels to reduce or increase pH.

PERIODIC SUPER CHLORINATION

Heavy swimmer loads, wind, dust and rainfall can cause bacteria and microscopic debris to accumulate in pool water. To maintain clean, clear water, super chlorinate with Granular Chlorinating Concentrate, as prescribed on label, every two weeks, weekly during hot weather.

STORAGE AND DISPOSAL: Store this product dry in a cool, dark place. Do not store in areas where children or pets can reach. Store in a cool, dry place away from heat or open flame. In case of decomposition, isolate container and remove it from area with large amount of water to destroy all contents before disposing this container. Do not leave empty container in area where children or pets can reach.

GPC®

SLOW DISSOLVING

FOR SWIMMING POOLS

- Stabilized
- Sun Protected
- 100% Soluble

Active ingredient:

Trichloro-S-Triazinetrione 99%

Inert ingredient 1%

100%

Available Chlorine 90%

Contains 160 tablets approximately 1/2 ounce each

DANGER: KEEP OUT OF REACH OF CHILDREN

**KEEP OUT OF REACH OF CHILDREN
• DANGER HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, skin, or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burn to broken skin. Wear goggles or face shield a protective clothing when handling. Wash hands after handling.

PRACTICAL TREATMENT (FIRST AID): If swallowed feed gruel, cooked cereal, or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water at least 15 minutes. For eyes get medical attention as soon as possible. Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS: Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, dirt, organic matter, or oil chemicals, or any other foreign matter, may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, ponds or public waters. Permits may be required for discharges containing this pesticide into public waters. For guidance contact the regional office of the Environmental Protection Agency.
