

SEARS

Quick Dissolving Granular Shock

Precautionary Statements

DANGER

Hazards to Humans & Domestic Animals
Keep Out of Reach of Children

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. When handling, wear rubber gloves and goggles or face shield and use only thoroughly clean dry utensils. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Properly drink large quantities of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol.

IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention.

IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IF INHALED: Remove person to fresh air. Get medical attention.

PHYSICAL OR CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT

Mix only into water. Use clean dry utensils. Do not add this product to any dispensing device containing the remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge into lakes, streams, ponds, or public waterways unless in accordance with a NPDES permit. For guidance, contact the regional office of the Environmental Protection Agency.

NET WT. 5 LB (2.25 kg)

CONVENIENT AND EFFECTIVE BACTERIA AND ALGAE CONTROL

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

POOL START-UP - INITIAL TREATMENT

When first filling your new pool or refilling with fresh water at any time:

- 1 Shock treat with this product as prescribed below, to destroy harmful bacteria.
- 2 Bring pool water pH within a range of 7.2 to 7.6. Add Sears Dry Acid to reduce pH or Sears Soda Ash to increase pH as prescribed on labels.
- 3 Add Sears Water Conditioner (cyanuric acid) as recommended on label.
- 4 Start maintenance program.

SHOCK TREAT

Shock your pool every two weeks, and after a rain or at the first sight of green or cloudy water. Extremes in temperature, swimmer loads, wind and dust can cause bacteria, algae and debris to accumulate in pool water and can require weekly shock treatment. To shock, add 25 ounces of this product per 10,000 gallons of pool water to bring chlorine level to a range of 10 ppm. Treat pool at night- do not allow swimmers to enter pool until chlorine level has dropped to 3 ppm.

STORAGE AND DISPOSAL

Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container (if possible) and flood area with large amounts of water to dissolve all material before discarding this container. Do not reuse empty container, but place in trash collection. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.
