Richey Industries, Inc. P.O. Box 928 Medina, OH 44258-0928

Attention: Alan G. Sprague

Vice President Operations

#### Gentlemen:

Subject: Chlorinated Jumbo Tablets
EPA Registration No. 6284-31
Your Amendment Application Dated June 24, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that you:

- 1. Make the following revisions before you release the product for shipment bearing the amended labeling.
  - a. Delete "General Classification."
  - b. Revise the front panel referral statement to read "See practical treatment and additional precautions on side panel."
  - c. Revise "This product is toxic to fish" to read "This pesticide is toxic to fish."
  - d. Under "Maintenance Program" include instructions to test and maintair the water pH to between 7.2 to 7.6.
  - e. Relocate the practical treatment statements so that they appear immediately below the precautionary statements.
  - f. Include the manufacturer's street address on the labeling.

Precautionary Statements
DANGER
Hazards to Humans & Domestic Animals
Keep Out Of Reach Of Children

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. When handling, wear rubber gloves and goggles or face shield and use only thoroughly clean dry utensils. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waterways unless in accordance with a NPDES permit. For guidance, contact the regional office of the U.S. Environmental Protection Agency.

### PHYSICAL OR CHEMICAL HAZARDS:

### STRONG OXIDIZING AGENT

dispensing device containing the remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

# PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Promptly drink large quantities of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol.

IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention, IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IF INHALED: Remove person to fresh air. Get medical attention.

# (SIDE PANEL) (6284-31)

These tablets control bacteria and aloae in swimming pools. They contain 90% available chlorine. They are stabilized to protect against chlorine loss due to ultraviolet rays of the sun...100% soluble, leave no calcium residue—and dissolve slowly to provide continuous round—the-clock protection.

The number of tablets required for your pool will vary depending on chlorine demand. Diter cycle and method of feeding: floater, automatic chlorinator or skimmer. High temperatures, dust, wind, rain and number of swimmers can increase chlorine requirements.

DIRECTIONS FOR USE General Classification

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

FOUL CIART OF THEFTAL TREATMENT

When first filling your new pool or refulling with fresh water at any time:

- 3. Short treat by adding enough granular chlorine or other fast dissolving chlorine products to provide approximately 10 ppm available chlorine. Follow . instructions on label of product used. Do not enter the pool until chlorine level has dropped to 3 ppm.
- 2. Bring pool water pH within a range of 7.2 to 7.6. Add dry acid to reduce pH or soda ash to increase pH as prescribed on labels.

- wid Commanys

  3. Add water conditioner (cyanuric acid) as recommon the absentage of the state of
- 4. Start maintenance program.

00T 3 I 1988

# MAINTENANCE PROGRAM

To start chlorination, place tablets in your chlorinator, floater or skimmer. Add 1 tablet for each 10,000 gallons of skimmer every five (5) days, or as needed, to maintain a chlorine residual of 1 to 3 ppm.

Test your pool water daily and adjust the chlorinator or floater. Make necessary adjustments with appropriate pool chemicals.

If tablets are placed in skimmer, run pump and filter until tablets are dissolved.

Do not throw tablets directly into pool--spotting or etching will occur.

SHOCK TREAT

Shock your pool every two weeks, and after a rain or at the first sight of green or cloudy water. Extremes in temperature, swimmer loads, wind and dust can cause pacteria, algae and debris to accumulate in pool water and can require weekly shock treatment. Add enough granular chlorine or other fast dissolving chlorine products to provide approximately 10 ppm available chlorine. Treat pool at might—do not allow simmers to enter pool until chlorine level has dropped to 3 ppm. Follow instructions on label of product being used.

STORAGE AND DISPUSAL

Feep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area awa. Toom heat or open flame. In case of decomposition, isolate container (if possible; and flood area with large amounts of water to dissolve all materials before discarding this cintainer. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.
