SLOW DISSOLVING

FOR SWIMMING POOLS

8-Ounce Tablets

Control bacteria and algae in swimming pools—Concentrated—Stabilized—100% Soluble. Contain 90% available chlorine. They are stabilized to protect against chlorine loss due to ultraviolet rays of the sun...100% soluble, leave no calcium residue—and they dissolve slowly to provide continuous round-the-clock protection.

One 8-Ounce Tablet in a floater feeder will deliver 1 ppm available chlorine in a 4500 gallon pool when filter pump is running 24 hours a day. The number of tablets required for your pool will vary depending on chlorine demand, filter cycle and method of feeding: floater, automatic chlorinator or skimmer. High temperatures, dust, rain and number of swimmers can increase chlorine requirements.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

POOL START-UP—INITIAL TREATMENT

1. When first filling your new pool or refilling with fresh water at any time:
1. Super Chlorinate (shock treat) by adding enough chlorinated granules or liquid to provide approximately 10.0 ppm available chlorine. Follow instructions on label of product used.
2. Bring pool water pH within a range of 7.2 to 7.6.
3. Add Water Conditioner (Cyanuric Acid) as recommended on label.
4. Start chemical maintenance program.

To start chlorination, put one 8-Ounce Tablet in your pool water frequently and adjust the number of tablets being used in order to maintain an available chlorine level of 1 to 2 ppm. Maintain pH in the 7.2 to 7.6 range where chlorine is most effective.

CAUTION: Do not throw tablets directly into pool—spotting or etching will occur.

SUPERCHLORINATE—SHOCK TREAT
Super Chlorinate every two weeks, after a rain or at the first sight of green or cloudy water. Extremes in temperature or swimmer loads can create a demand for more chlorine than your regular daily dosage provides. Add enough chlorinated granules or liquid to provide approximately 10 ppm available chlorine. Follow instructions on label of product used.

STORAGE AND DISPOSAL

Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to deactivate all material before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

Active ingredient:
Trichloro S-Triazinetrione
Inert ingredient.....

Available Chlorine..... 90%
Contains 15 tablets approximately 8 ounces each 100%

DANGER: KEEP OUT OF REACH OF CHILDREN
See additional precautions and first aid on side panel.

NET WT. 9 LB.

- Stabilized
- Sun Protected
- 100% Soluble

DANGER
KEEP OUT OF REACH OF CHILDREN
PRACTICAL TREATMENT
Feed bread soaked in milk, then oil. Call a physician immediately.
If on skin: Brush off excess with cold water for at least 15 minutes, get medical attention.
If in eyes: Flush with cold water. Get medical attention.

DANGER
PRECAUTIONARY STATEMENT
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Highly corrosive. Causes skin irritation if swallowed. Do not breathe dust. Wear goggles and gloves when handling. Irritation of eyes. Remove clothing before reuse.

ENVIRONMENTAL HAZARD
This product is toxic to fish, lakes, streams, ponds, or in accordance with a NPDES Permit from the regional office of EPA.

PHYSICAL AND CHEMICAL
STRONG OXIDIZING AGENT
Strong Oxidizing Agent. Mix dry utensils. Do not add this device containing remnants of other chemicals may start a violent reaction. Contamination with possible generation of fire. Contamination or decomposition. If possible, isolate and ventilate area. Flood with water if necessary.
