Richey Industries, Inc. P.O. BOX 928 Medina, OH 44258-0928

Attention: Alan C. Sprague

Vice President, Operations

Gentlemen:

Subject: Labeling

Chlorinated 8 Ounce Sticks EPA Registration No. 6284-36 Your Amendment Application Dated June 23, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that you make the following revisions before you release the product for shipment bearing the amended labeling:

- Delete "General Classification" beneath the "Directions for Use" heading.
- 2. Under Maintenance Program, include instructions to test and maintain the water pH to between 7.2 to 7.6.
- 3. Revise the referral statement to read "See additional precautions and practical treatment statement on side panel."
- 4. Include the company's street address.

We have adjusted our records to reflect the product name change as indicated above.

A stamped copy of the label is enclosed for your records.

Submit the final printed labeling for inclusion in the product file.

It is understood that the labeling for the additional brand name products will comply with this labeling.

If you have any questions in this regard, contact Ms. Ruth Douglas at (703) 557-3842.

Sincerely yours,

Jeff Kempter

These sticks control bacteria and algae in swimming pools. They contain 90% available chlorine. They are stabilized to protect against chlorine loss due to ultraviolet mays of the sun...100% soluble, leave no calcium residue—and dissolve slowly to provide continuous round the clock protection.

The number of sticks required for your pool will vary depending on chlorine demand, filter cycle and method of feeding: floater, automatic chlorinator or slimmer. High temperatures, dust, wind, rain and number of swimmer conjunctivese chlorine requirements.

PHOR STARTION INITIAL IREALMENT

Micen tired tillion von a new post or retalling with the R wider of me time:

- Short treat to addition enough granular children or of other fact dissolving chloring products on a condespino mental, 10 ppm available chtoring, full or mestructions on label of product used. Do not onto
- Soing pool water pH within a range of 7.2 to 7.5. Add dry acid to reduce pH or soda ash to increase pH as prescribed on labels.

the pool until chlorums level has dropped to I pomp

- Add water conditioner (cyanuric acid) as recommended on label.
- 4. Start maintenance program.

MAINTENANCE PROGRAM

To start chlorination, place sticts in your chlorinator, floater or slimmer. Approximately 1 stick for each 10,000 gallons of water will be required every week. Use more or less as needed, to maintain a chlorine residual of 1 to 3 ppm.

Test your pool water daily and adjust the chlorinator or floater. Make necessary adjustments with appropriate pool chemicals.

If sticks are placed in skimmer, run pump and filter until tablets are dissolved.

Pinisa

To not throw stacks directly into pool—spotting or etching will occur.

SHOCK INFAT

Theel cour peol every two weeks, and after a rain or at the times sught of green or cloudy water. Estremes in temperature, swimmer loads, wind and dust can cause bacteria, algue and debris to accumulate in peol water and can require weekly shoot treatment. Add enough granular chloring or other fast dissolving chlorine products to provide approximately to pum available chlorine. Treat peol at might do not allow simmers to enter pool until chlorine is, dies dropped to i ppm. Follow instructions on label of might being used.
