Active Ingredient:
Sodium Dichloro-s-triazinetrione
anhydrous 90
Inert Ingredients: 10
Available Chlorine 60

6284-42

Keep Out of Reach of Children

DANGER!

See First Aid Statement and Additional precautions on Side Panel.

Net Wt. 2 lbs.

EPA Registration No. EPA Est. 6234-0H-2

Hazard To Humans and Domestic Animals

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and use clean, dry utensils when handling. Irritating to nose and throat. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (PRACTICAL TREATMENT)

If swallowed: Feed large amounts of milk and/or water and induce vomiting, call a physician immediately.

If on Skin: Flush off excess chemical and flush skin with water for at least 15 minutes. If irritation persists, get medical attention.

If in Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.

If Inhaled: Remove person to fresh air. Get medical attention.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT. Use only clean, dry, oil-free, non-flammable materials. Do not mix this product with any other chemicals. Do not mix with organic solvents or other products. Contamination of water, oil, dirt, organic solvents or other chemicals (including pool chemicals) will start a violent reaction with generation of heat. Violation of hazardous conditions may cause generation of fire and explosion. RISK OF generation of chlorine and possibly toxic gases. Avoid contact with skin or inhalation of dust. Do not smoke or use open flame.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in a trash collection or dispose in approved landfill area, or bury in a safe place. IN CASE OF CONTAMINATION OR DECOMPOSITION, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volume of water, avoid breathing fumes. Dispose of contaminated material in an approved landfill or bury in a safe place.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FOR CONTROL OF BACTERIA AND ALGAE IN SPAS

1. Before bathing, test water pH, chlorine residual and alkalinity using a suitable test kit. Adjust residual to 3 ppm. After bathing superchlorinate to 6 ppm (1 level tablespoon per 500 gallons of water). Use a chlorine stabilizer, especially outdoors to prolong chlorine residual. Maintain pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm with the addition of sodium bicarbonate or diluted muriatic acid. *or dry acid.*
2. This product does not affect pH or alkalinity of water. One tenth oz. ($\frac{1}{2}$ tsp.) per 500 gal. of water gives 1 ppm and 1 level tbsp. gives 6 ppm of chlorine. To use, broadcast granules into water with jets running. Bathing can start at once.
3. With 4 bathers in a 500 gal. spa, a 2 ppm chlorine residual can drop below the minimum 1 ppm in 15 to 20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residue above 1 ppm.
4. Weekly, superchlorinate water to 5 or 6 ppm (see 2 above). Do not bathe until chlorine drops to 3 ppm. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage. Avoid use of products such as body lotions that consume chlorine.
