Medina, OH 44258-0928

Attention: Alan G. Sprague
Vice President Operations

Gentlemen:

Subject: Chlor Concentrate
EPA Registration No. 6284-42
Your Amendment Application Dated June 14, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that you:

1. Make the following revisions before you release the product for shipment bearing the amended labeling.
 - a. Delete "General Classification."
 - b. Revise the front panel referral statement to read "See practical treatment and additional precautions on back panel."
 - c. Revise "This product is toxic to fish" to read "This pesticide is toxic to fish."
 - d. Relocate the practical treatment statements so that they appear immediately below the precautionary statements.
 - e. Include the manufacturer's street address on the labeling.
 - f. In #1 of the instructions, revise "Adjust residual to 4 to 5 ppm" to read "Adjust residual to 3 ppm."
 - g. In #4 of the instructions, revise "Do not bathe until chlorine drops to 5 ppm" to read "Do not bathe until chlorine drops to 3 ppm."

2. Submit the final printed labeling for inclusion in the product file.

Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

If you have any questions in this regard, please contact Ms. Ruth Douglas at (703) 557-3842.

Sincerely yours,

Jeff Kempter

Precautionary Statements

DANGER

Hazards to Humans & Domestic Animals

Keep Out Of Reach Of Children

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. When handling, wear rubber gloves and goggles or face shield and use only thoroughly clean dry utensils. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waterways unless in accordance with a NPDES permit. For guidance, contact the regional office of the U.S. Environmental Protection Agency.

PHYSICAL OR CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT

Mix only into water. Use clean dry utensils. Do not add this product to any dispensing device containing the remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Promptly drink large quantities of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol.

IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention.

IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IF INHALED: Remove person to fresh air. Get medical attention.

STORAGE AND DISPOSAL

Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all material before discarding this container. Do not reuse empty container, but place in trash collection. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

FEDERAL REGISTER

(Chlor-Concentrate, 6284-42)

OCT 31 1988

(Cont'd)

6284-42
A fast dissolving, fast acting sanitizer in a concentrated form. Makes control of pH simple since it has very little effect on water chemistry balance. The sanitizer does not contain hardness and leaves no residue.

DIRECTIONS FOR USE

General Classification

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For Control of Bacteria and Algae in Spas and Hot Tubs

1. Before bathing, test water pH, chlorine residual and alkalinity using a suitable test kit. Adjust residual to 4 to 5 ppm. After bathing super chlorinate to 10 ppm (2 level tablespoons per 500 gallons of water). Use a chlorine stabilizer outdoors to prolong chlorine residual. Maintain pH of water between 7.2 and 7.6 and total alkalinity between 75 and 125 ppm with the addition of sodium bicarbonate or diluted muriatic acid or dry acid.
2. This product does not affect pH or alkalinity of water. One tenth oz. (1/2 tsp.) per 500 gallons of water gives 1 ppm and 1 level tbsp. gives 6 ppm of chlorine. To use, broadcast granules into water with jets running. Bathing can start at once.
3. With 4 bathers in a 500 gallon spa, a 2 ppm chlorine residual can drop below the minimum 1 ppm in 15 to 20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residual above 1 ppm.
4. Weekly, shock treat water to 10 ppm (see 2 above). Do not bathe until chlorine drops to 5 ppm. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage. Avoid use of products such as body lotions that consume chlorine.
