BACTERIA AND ALGAE CONTROL

FAST DISSOLVE CHLORINATING TABLETS

FAST DISSOLVE STABILIZED TABLETS

Fast dissolving, completely soluble, provide a convenient pre-measured dosage. Eliminate possible spillage and measuring spoons associated with the use of granular chlorinating compounds.

DIRECTIONS FOR USE IN SWIMMING POOLS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not throw tablets directly into pool - spotting will occur. Tablets are to be added to the pool skimmer or into a floating dispenser.

START UP

1. Super chlorinate (shock treat) water by adding 1 tablet per 1,000 gallons of pool water. Use tablet dispenser or skimmer to dissolve tablets (see above). Let chlorine level drop to 1 to 2 PPM range.
2. Test pool water pH and adjust to the 7.2 to 7.6 range using dry acid or soda ash as required.
3. Add water conditioner* (stabilizer) as prescribed on label to give permanent protection of chlorine against loss due to sun light.

*New water only - not needed in water previously treated

DAILY

1. Add 1 tablet per 2,000 gallons of pool water. Test to determine chlorine level. If below 1 PPM, add enough tablets to bring it to 1 to 2 PPM range.
2. Test pH of pool water. Maintain pH in 7.2 to 7.6 range by adding soda ash or dry acid as required.

FOR PERIODIC SUPER CHLORINATION

Heavy swimmer loads, wind, dust and rainfall can cause bacteria and microscopic debris to accumulate in pool water. To maintain clean, clear water, super chlorinate every two weeks, weekly during hot weather.

1. Add 1 tablet to dispenser or skimmer per 1,000 gallons of water to bring chlorine level up to the 5 to 10 PPM range.
2. Treat pool at night and allow chlorine level to drop to 3 PPM before allowing swimmers to enter pool.

• Use 1 a day for 2000 gallons of pool water

- Sanitize pool water
- Protect against bacteria and algae
- 100% Soluble

Active Ingredient
Trichloro S Triazine Trihydrochloride 65%
Inert Ingredient 37%
100%

Available Chlorine 9.5%

DANGER: KEEP OUT OF REACH OF CHILDREN

See additional first aid and pre-cautions on side panel

NET WEIGHT 32 OZ. (2 LBS.) (0.9 KG)

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place container in trash collection or dispose in approved landfill area, or bury in a safe place.

KEEP OUT OF REACH OF CHILDREN
• DANGER HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear goggles or face shield and protective clothing when handling. Wash hands after handling.

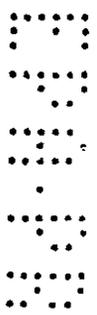

PRACTICAL TREATMENT (FIRST-AID): If swallowed feed gruel, cooked cereal, or bread soaked in milk, followed by olive oil or cooking oil.

In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention as soon as possible. Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS: Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, dirt, organic matter, or other chemicals, or any other foreign matter, may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, ponds, or public waters. Permits may be required for discharges containing this pesticide into public waters. For guidance contact the regional office of the Environmental Protection Agency.
