PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Keep Out of Reach of Children

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. When handling, wear rubber gloves and goggles or face shield and use only thoroughly clean dry utensils. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Promptly drink large quantities of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol.

IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention.

IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IF INHALED: Remove person to fresh air. Get medical attention.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge into lakes, streams, ponds, or public waterways unless in accordance with a NPDES permit. For guidance, contact the regional office of the U.S. Environmental Protection Agency.

PHYSICAL OR CHEMICAL HAZARDS

Strong Oxidizing Agent

Mix only into water. Use clean dry utensils. Do not add this product to any dispensing device containing the remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL

Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all material before discarding this container. Do not reuse empty container, but place in trash collection. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

SPEED-Y-TABS

Each tablet weighs approximately 2-1/2 ounces

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

These tablets provide a steady source of available chlorine to control the growth of algae and kill many harmful bacteria. They dissolve quickly and have a neutral pH. There is no calcium build up or scale formation.

Add tablets to pool skimmer, or place into floating dispenser. If floater is used, do not use floater for any other chemicals.

POOL START-UP--Initial Treatment

When first filling your new pool or refilling with fresh water at any time:

1. Shock treat with this product as prescribed below, to destroy harmful bacteria.
2. Bring pH of pool water within a range of 7.2 to 7.6. Add dry acid to reduce pH or soda ash to increase pH as prescribed on labels.
3. Add water conditioner (cyanuric acid) as recommended on label.
4. Start maintenance program.

MAINTENANCE PROGRAM

Add 1 tablet of this product for each 10,000 gallons of pool water every other day to maintain a chlorine residual of 1 - 3 ppm. Maintain a pH reading of 7.2 to 7.6. Test your water daily and make necessary adjustments with appropriate pool chemicals.

Do not throw tablets directly into pool.

SHOCK TREAT

Shock your pool water every two weeks, and after a rain or at the first sight of green or cloudy water. Extremes in temperature, swimmer loads, wind and dust can cause bacteria, algae and debris to accumulate in the water and can require weekly shock treatment. For spas or hot tubs shock after each use. To shock add 10 tablets of this product per 10,000 gallons of water to bring chlorine level to a range of 10 ppm. Treat pool at night--do not allow swimmers to enter the water until chlorine level has dropped to 3 ppm.

SUPPLEMENTAL LABEL

Cold Guard Winterizing Tablets

ACTIVE INGREDIENT:

Sodium Dichloro-s-Triazinetrione Dihydrate 99%
Inert Ingredient 1%

Available Chlorine 55%

These tablets will help protect your pool water over the winter months, making Spring start-up easier and less costly.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Prepare your pool for closing by adding through the skimmer 3 tablets per 1,000 gallons of pool water (this will give you approximately 30 ppm chlorine). Add tablets gradually over a 2-3 hour period. Do not throw tablets directly into pool. Run filter until completely dissolved.

Follow manufacturers' directions regarding winterizing your heater, pump and filter components. Cover the pool with your winter pool cover. When the pool cover is removed in the Spring, follow "Pool Start-Up" directions.
