

Ansar 529

Herbicide

MSMA Liquid Plus Surfactant
For Selective Post-Emergent Weed Control

ACTIVE INGREDIENT:

Monosodium Acid Methanesulfonate* . . . 35.78%

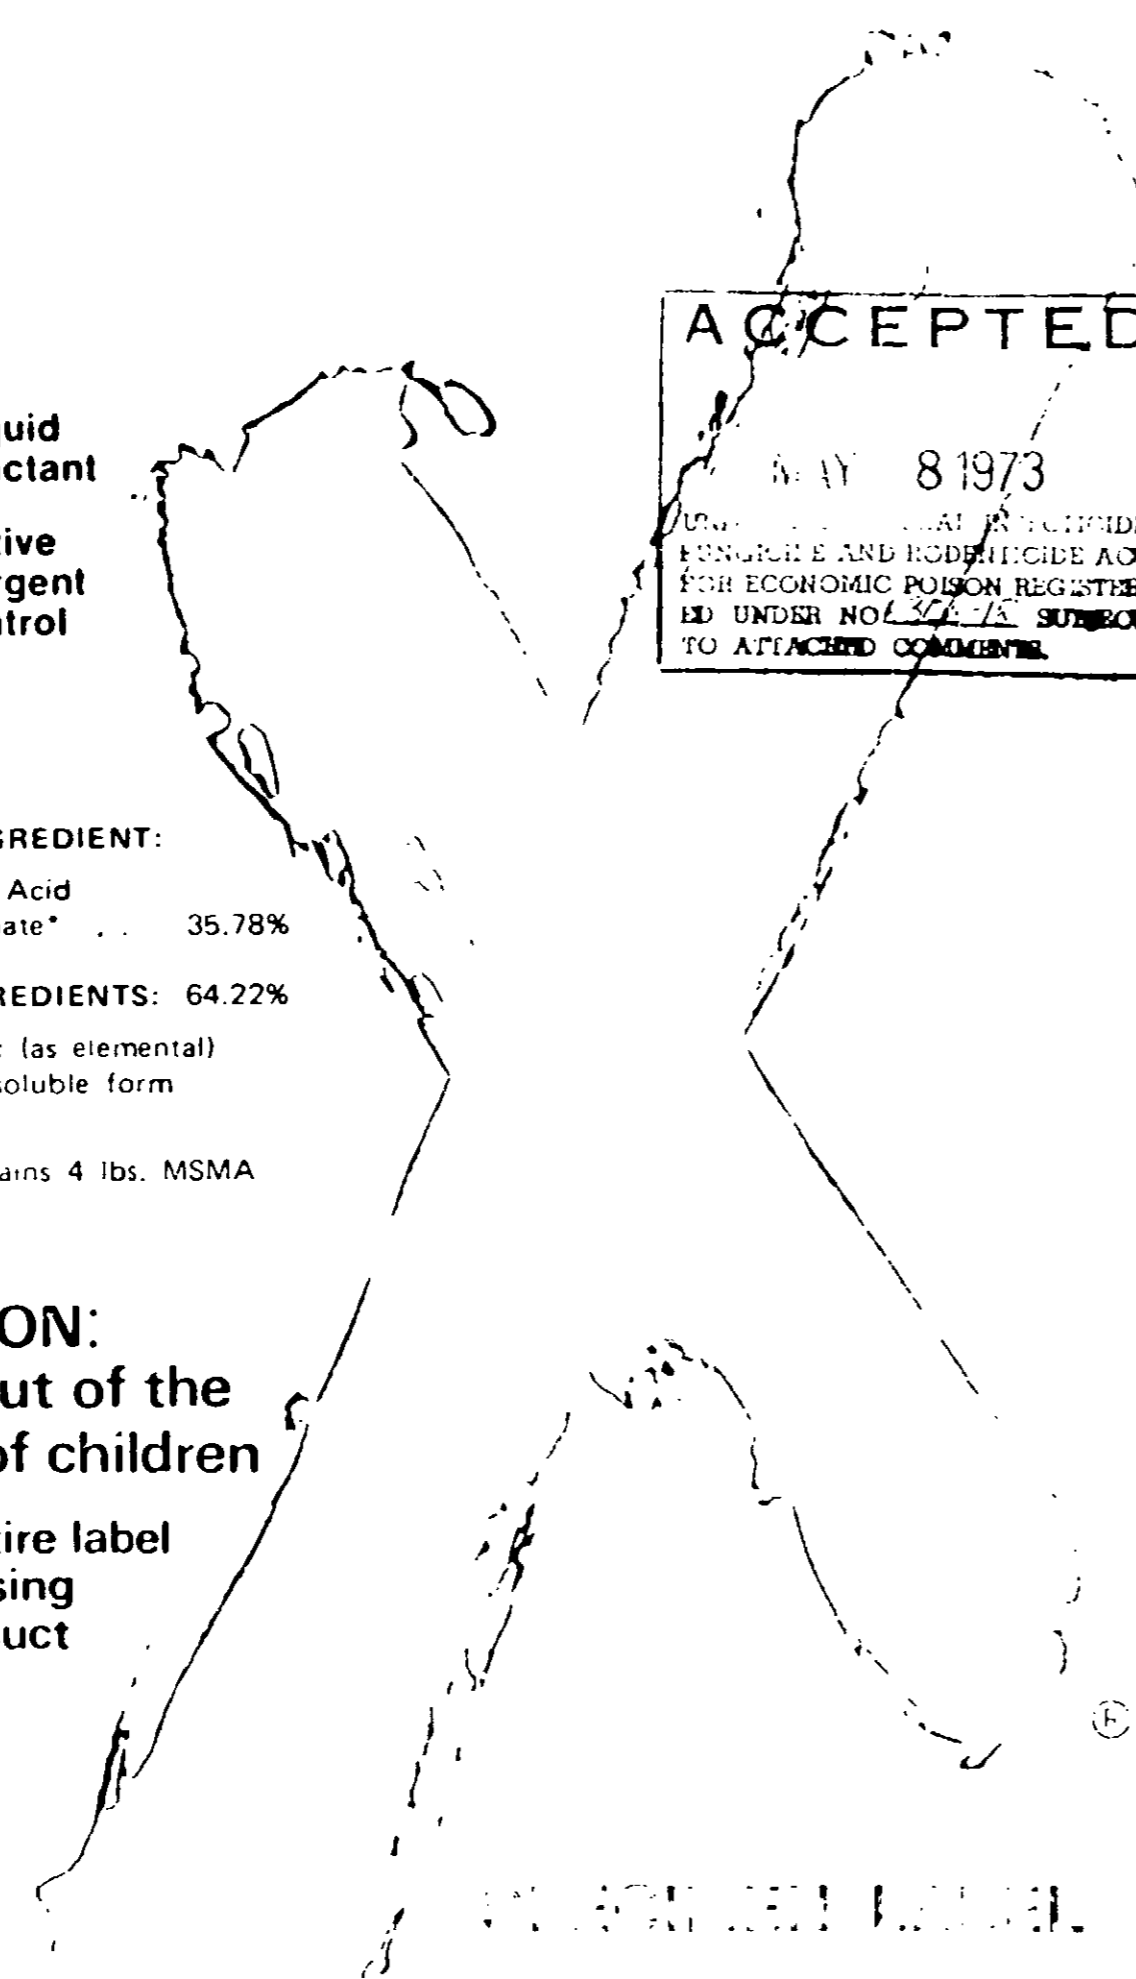

INERT INGREDIENTS: 64.22%

Total Arsenic (as elemental) all in water soluble form 16.55%

*Product contains 4 lbs. MSMA per gallon.

CAUTION:
Keep out of the reach of children

Read entire label before using this product

DO NOT REUSE LABEL

CAUTION: Keep Out of the Reach of Children

CAUTION: This material should be used only with care. Avoid breathing vapors or dust which may be inhaled after using. Avoid contact with eyes, nose, mouth, and clothing. Wash hands and face after use. If this material has been spilled, wash thoroughly.

ANTIDOTE: In case of poisoning, get medical aid and call physician at once.

READ ENTIRE LABEL BEFORE USING THIS PRODUCT.

WARRANTY - CONDITION OF SALE: LIMITATIONS FOR USE of this product are based on field use and tests. We warrant that this product will perform as stated on the label. We do not warrant the results of use of this product because of the effects of weather conditions, soil conditions and manner of application. We are beyond the control of The Ansar Company in the use of this product. Such things as crop injury, ineffectiveness or damage to other crops may occur. **ALL SUCH RISKS ARE ASSUMED BY THE BUYER.**

Ansar warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the directions for use as modified by the above. Ansar makes no other warranties, express or implied, including **FITNESS OR MERCHANTABILITY.** In no case shall Ansar or the Seller be liable for consequential, special or indirect damages resulting from the use or handling of this product. The foregoing is a condition of sale by The Ansar Company and is accepted as such by the Buyer.

GENERAL INFORMATION: ANSAR 529 Herbicide is useful for selective post-emergent weed control, particularly for grassy weeds. It is a physical property of this herbicide that it can be used in combination with other herbicide and surfactant. It is unnecessary to add any other surfactant to the spray solution. Best results are obtained on young actively growing weeds at air temperatures above 70° F.

MIXING INSTRUCTIONS: ANSAR 529 Herbicide is completely water soluble. Fill the spray equipment tank about half full with water and add the required amount of herbicide with agitation. Finish filling the tank with water and apply. After use, clean equipment thoroughly, flushing with water. Do not store spray solution in tank for a prolonged period. Although ANSAR 529 Herbicide is only moderately corrosive, do not use on galvanized or aluminum equipment.

CONTAINER DISPOSAL: Do not reuse empty container. Wash thoroughly with water and detergent, crush if possible and discard in a safe place.

Do not contaminate waters used for domestic consumption, or by animals, wildlife and aquatic life, or for irrigation purposes. Do not feed treated foliage to livestock or graze treated areas.

DIRECTIONS FOR USE:

COTTON: ANSAR 529 Herbicide is useful for directed application in cotton for post-emergent control of weeds and grasses such as johnsongrass, nuttallgrass, dogfennel, cockspur, ragweed, sandspur and purple vine. It should be applied at the rate of 2 quarts per acre.

Mix 5 quarts of ANSAR 529 Herbicide in 100 gallons of water. Do not add any surfactant to the spray solution. Apply spray solution at 40 gallons per acre. Avoid contact with foliage at temperatures above 70° F. For best application, use 40 inch nozzle with 1/2 inch of spray solution per inch of land with per acre of cotton. Direct the spray solution to the back of the cotton plant. Reapplication should be made so as to avoid spraying the cotton foliage. If re-growth occurs, a second application 3 to 3 weeks after the first. Slight burning and a reddish discoloration of the cotton leaf may occasionally occur following the recommended treatment, but the cotton plant will develop normally.

Apply only when cotton is 3 inches high to first bloom. Do not apply after first bloom.

CITRUS BEARING AND NON BEARING (except Florida): ANSAR 529 Herbicide is useful as a directed application on citrus fruit and such as orange, grapefruit, tangerine, lemon and lime orchards. It should be applied at the rate of 2 to 4 quarts per acre.

Mix ANSAR 529 Herbicide at the rate of 2 quarts in 50 gallons of water. Apply as a directed spray in interspaces and around base of trees. Spray on unwanted vegetation to prevent fruit fall. If used with fruit, apply as required, however, do not exceed 3 applications per year.

Do not allow spray solution to contact fruit, leaves, stems or bark, for a field of nursery plantings or young trees.

AGRICULTURAL PLANTINGS: ANSAR 529 Herbicide is useful for directed application in nursery plantings and in the bearing orchards of fruit and nut trees such as apple, pear, peach, plum, cherry, almond and walnut orchards. It should be applied at the rate of 2 to 4 quarts per acre.

Mix ANSAR 529 Herbicide at the rate of 2 quarts in 50 gallons of water. Apply as a directed spray in interspaces and around base of trees in orchards. Spray on unwanted vegetation to prevent fruit fall. If re-growth occurs, reapply as required. However, do not exceed 3 applications per year.

Do not allow spray solution to contact leaves, stems or bark. Use a shield, if necessary, for nursery plantings or young trees. Do not apply around trees or vines from which fruit will be harvested within one year of treatment.

NON-CROP: ANSAR 529 Herbicide is useful for control of johnsongrass, nuttallgrass and other weeds on drainage ditchbanks, rights of way, fence rows, orchard yards and around home grounds. Mix ANSAR 529 Herbicide at a rate of 2 to 5 quarts in 100 gallons of water. Spray unwanted vegetation thoroughly to kill. Part of the off-leaf spray equipment that is used for this purpose may be used for other purposes if they are not contaminated.

LAWN AND ORNAMENTAL TURF: ANSAR 529 Herbicide is useful for control of weeds on lawns and ornamental turf. It should be applied at the rate of 2 to 4 quarts per acre. Mix ANSAR 529 Herbicide at the rate of 2 to 4 quarts in 50 gallons of water. Apply as a directed spray in interspaces and around base of trees in orchards. Spray on unwanted vegetation to prevent fruit fall. If re-growth occurs, reapply as required. However, do not exceed 3 applications per year.

Mix ANSAR 529 Herbicide at the rate of 2 quarts in 50 gallons of water. Apply as a directed spray in interspaces and around base of trees in orchards. Spray on unwanted vegetation to prevent fruit fall. If re-growth occurs, reapply as required. However, do not exceed 3 applications per year.
