

DISODIUM METHANEARSONATE

Technical Grade

For Use In Formulating
Herbicides Only

Not For Sale Under This Label

ACTIVE INGREDIENT

DISODIUM METHANEARSONATE

98% (98.0%)

NET WEIGHT

5.0000

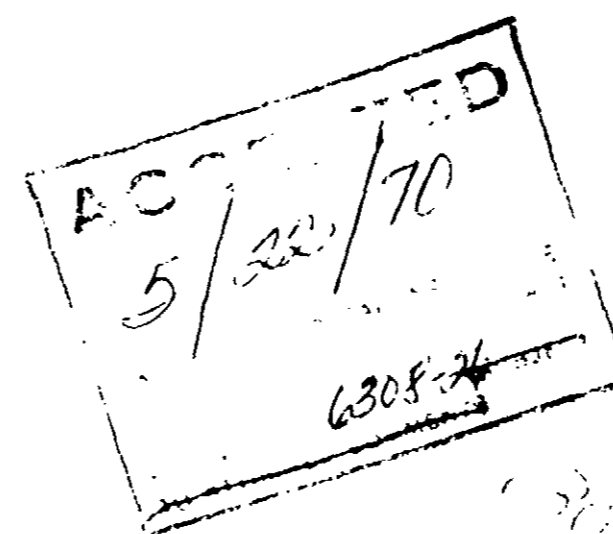

SPECIMEN LABEL

A product of The Ansul Company

CAUTION: Keep Out of Reach of Children

DISODIUM METHANEARSONATE

Data Sheet

Technical Grade For Use In Formulating Herbicides

PHYSICAL PROPERTIES

Appearance..... White, crystalline powder
Arsenic Content (as elemental)..... 33.0%
Solubility in water at 20°C..... 15%

HANDLING

Since Disodium Methanearsonate is somewhat hygroscopic, it should be stored in a dry place and the container kept tightly closed when not in use. The Acute Oral LD₅₀ of Disodium Methanearsonate is estimated to be 2200 mgs./kg. of body weight when tested on young male and female albino rats. While it is considered to be only moderately toxic, it is recommended that prolonged breathing of the dust and spray solutions be avoided.

CONTAINER SPECIFICATIONS

Polyethylene Lined Carton
Dimensions — 13¾" x 13¾" x 14"
Gross Weight — 55 pounds
Net Weight — 50 pounds
