WARRANTY - CONDITION OF SALE
DIRECTIONS FOR USE of this product are based on field use and tests believed reliable and should be followed carefully. It is however, impossible to eliminate all risks associated with use of this product. Because such factors as weather conditions, foreign material and manner of use for application are all beyond the control of The Ansol Company or the Seller of this product, such things as crop injury, ineffectiveness or other unexpected consequences may result. ALL SUCH RISKS ARE ASSUMED BY THE BUYER.

Ansol warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the directions for use as modified by the above. Ansol makes no other warranties, express or implied, including FITNESS or MERCHANTABILITY. In no case shall Ansol or the Seller be liable for consequential, special or indirect damages resulting from the use or handling of this product. The foregoing is a condition of sale by The Ansol Company and is accepted as such by the Buyer.

GENERAL INFORMATION: PHYBAN H.C. Railroad and Industrial Herbicide is a special formulation of monosodium acid methanearsonate (MSMA) in combination with a surfactant (wetting agent) for general post-emergent weed control. It is unnecessary to add any other surfactant to the spray solution. This product is effective on both broadleaf weeds and grasses. The properties of this material are largely inactivated on contact with the soil. Best results are obtained on young, actively growing weeds at air temperatures above 70° F.

MIXING INSTRUCTIONS: PHYBAN H.C. Railroad and Industrial Herbicide is completely water soluble. For the spray solution, mix one part herbicide with one part water and add the required amount of herbicide to the mixture. Fill the spray tank with water and apply. Rinse the spray equipment after use and do not store the spray tank in non-cropland located away from water supplies. Do not store spray solution in tank for a prolonged period. Although PHYBAN H.C. Railroad and Industrial Herbicide is only slightly corrosive, do not use in galvanized or aluminum equipment.

CONTAINER DISPOSAL: Do not reuse empty container. Perforate, crush and bury in a safe place. Drums may be returned to a drum reconditioner.

DIRECTIONS FOR USE: PHYBAN H.C. Railroad and Industrial Herbicide is a post-emergent herbicide useful for control of annual broadleaf weeds and grasses, such as pigweed, wild mustard, wild radish, chickweed, lambsquarters, redtop, pigweed, giant foxtail and yellow foxtail, crabgrass, and to the extent that perennials such as johnsongrass, dallisgrass, stinger and timothy. PHYBAN H.C. Railroad and Industrial Herbicide is recommended for control of weeds and grasses of way, of roads, highway, utility lines and pipelines, and other areas such as high grass, brush around power plants and buildings, and along fences, sidewalks, driveways and parking lots.

Use PHYBAN H.C. Railroad and Industrial Herbicide at the rate of 1 gallon per acre in sufficient water to get the desired coverage. Any spray equipment that a suggested coverage may be used. Avoid spray contact with foliage of trees, shrubs and ornamentals. Control of trees and shrubs in treated areas.

Do not contaminate waters used for domestic consumption, or by animals, wildlife and aquatic life, or for irrigation purposes.
