Herbicide

Herbicide

INERT INGREDIENTS:

ACTIONS AND THERAPEUTIC USE:

For Selective Post Emergent Weed Control

ACTIVE INGREDIENT:

Monosodium Acid Methanesulfonate* 58.39%

Inert Ingredients: 41.61%

Total Active (as elemental) in water soluble form 27.01%

*Product contains 8.00 lb. LISSMA per gallon.

CAUTION:

Keep out of the reach of children

Read entire label before using this product

READ ENTIRE LABEL BEFORE USING THIS PRODUCT.

WARRANTY - CONDITION OF SALE: CONDITIONS FOR USE of this product are based on field use and tests beforehand and should be followed carefully. It is however possible to tolerate a very concentrated use of this product. The use of too high concentrations may result in plant damage. Herbicide should be used only as directed on the label. Read the entire label before using this product.

ANTIDOTE: If taken internally, induce vomiting and call physician at once.

MIXING INSTRUCTIONS:

For best results, mix with water to a concentration of 3 fl oz per gallon. Do not exceed 5 fl oz per gallon. Apply 1 fl oz of spray solution per square foot of treated area. Apply the entire application within 3 weeks of spraying. Apply only when plants are in the natural dormant state.

CONTAINER DISPOSAL:

Do not reuse empty container. Wash thoroughly with water and detergent, crush if possible, and discard in a safe place.

DIRECTIONS FOR USE:

COTTON: ANSILAR 170 H.C. Herbicide is useful as a directed application in cotton for the post-emergent control of weeds and grasses such as pinks, field soybeans, nutsedge, dandelions, and other similar weeds. If you cannot obtain the desired control of weeds and grasses, apply a 15% solution of the herbicide to the soil surface at a rate of 10 gallons of water per acre. Apply the entire application within 3 weeks of spraying. Apply only when cotton is at least 3 inches high and has not been replanted since the first bloom. Do not apply after first bloom. Do not feed treated foliage to livestock or poultry.

Herbicide:

ANSILAR 170 H.C. Herbicide is useful for controlling pinks, field soybeans, nutsedge, and other weeds that are present in cotton. It is also effective against weeds that are present in cotton. Apply the entire application within 3 weeks of spraying. Apply only when cotton is at least 3 inches high and has not been replanted since the first bloom. Do not apply after first bloom. Do not feed treated foliage to livestock or poultry.
