 Net Weight (1 gallon) 11.6 pounds

5 Gallon Plastic Jug  
 Dimensions Outside Diameter 11 1/2", Height 14"  
 Gross Weight 61 pounds  
 Net Weight 58 pounds

### WARNING

MAD Herbicide is considered to be only a moderate toxicant and a moderate skin and eye irritant. It is recommended that contact with the material be avoided.

MAD Herbicide is a combination of MSMA, 2,4-D and surfactant. It has been developed to meet the need for a selective herbicide to control undesirable grasses and broadleaf weeds in mowed turf. It is also useful for the control of a wide variety of weeds in non-crop areas such as railroad rights-of-way, roadsides and storage areas.

MAD Herbicide is a contact herbicide useful for controlling annual broadleaf weeds and such as puncturevine, wild mustard, wild oats, chickweed, sandbur, common ragweed, barnyardgrass, giant foxtail and yellow foxtail and to top kill certain perennials such as quackgrass, Dallisgrass, nuttall's, and tules. Best results are obtained on young actively growing weeds.
