

ANSAR 8100

Herbicide

For Selective
Post-Emergent
Weed Control

ACTIVE INGREDIENTS:

Disodium
Methanearsonate* 81.0%

INERT INGREDIENTS: 19.0%

Total Arsenic (as
elemental) all in water
soluble form 33.0%

*Equivalent to 128.5%
Disodium Methanearsonate
Hexahydrate

CAUTION:
Keep out of the
reach of children

STATE REGISTRATION: FLORIDA

FLORIDA LAW prohibits the use of this material in a broadcast manner

CAUTION: Keep Out of the Reach of Children

CAUTION: Harmful if swallowed. Avoid contact with skin. Avoid breathing dust or spray mist. Wash hands after using. Avoid storage near feed or food products. Keep children and domestic animals off treated areas until this material has been washed into the soil.

ANTIDOTE: If taken internally, induce vomiting and call physician at once.

READ ENTIRE LABEL BEFORE USING THIS PRODUCT.

WARRANTY - CONDITION OF SALE: DIRECTIONS FOR USE of this product are based on field use and tests believed reliable and should be followed carefully. It is however impossible to eliminate all risks associated with use of this product. Because such factors as weather conditions, foreign material and manner of use for application are all beyond the control of The Ansul Company or the Seller of this product, such things as crop injury, ineffectiveness or other unintended consequences may result. **ALL SUCH RISKS ARE ASSUMED BY THE BUYER.**

Ansul warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the directions for use as modified by the above. Ansul makes no other warranties, express or implied, including FITNESS or MERCHANTABILITY. In no case shall Ansul or the Seller be liable for consequential, special or indirect damages resulting from the use or handling of this product. The foregoing is a condition of sale by The Ansul Company and is accepted as such by the Buyer.

CONTAINER DISPOSAL: Do not reuse empty container. Wash thoroughly with water and detergent, crush if possible, and discard in a safe place.

Do not contaminate waters used for domestic consumption, or by animals, wildlife and aquatic life, or for irrigation purposes. Do not feed treated foliage to livestock or graze treated areas.

GENERAL INFORMATION: ANSAR 8100 Herbicide is useful for selective post-emergent weed control, particularly for grassy weeds. Its activity is enhanced by addition of a suitable surfactant to the spray solution. It is most effective on young, actively growing weeds at air temperatures above 70°F. Its phytotoxic properties are quickly inactivated on contact with the soil.

MIXING INSTRUCTIONS: ANSAR 8100 Herbicide is completely water soluble. Fill the spray equipment tank about half full with water and add the required amount of herbicide with agitation. Finish filling the tank with water and apply. Do not store spray solution in tank for a prolonged period, and clean application equipment thoroughly after using by flushing with water. Although ANSAR 8100 Herbicide is only moderately corrosive, do not use in galvanized or aluminum equipment.

DIRECTIONS FOR USE:

COTTON: ANSAR 8100 Herbicide is useful as a directed spray application in cotton for post-emergent control of weeds and grasses including johnsongrass, nutsedge, dallisgrass, cocklebur, crabgrass, ragweed, sandbur and puncture vine.

Mix 7.0 pounds of ANSAR 8100 Herbicide in 100 gallons of water and add 1 to 2 quarts suitable surfactant. Weed control is most effective at temperatures above 70°F. For band application in 40 inch rows, apply 1 gallon of spray solution per inch of band width per acre of cotton.

Band Application: Direct the spray solution to the base of the cotton plant. Nozzles should be placed so as to avoid spraying the cotton foliage, but to give good coverage of the weeds and grasses. If regrowth occurs, make a second application about 1 to 3 weeks after the first. Slight burn and a reddish discoloration of the cotton leaf may occasionally occur following directed band application, but the cotton plant will develop normally.

Make band applications only when cotton is 3 inches high to first bloom. Do not apply after first bloom.

NON-CROP: ANSAR 8100 Herbicide is useful as a spot applied herbicide for control of johnsongrass, nutsedge, and certain other weeds on drainage ditchbanks, rights-of-way, fence rows, storage yards and similar non-crop areas.

Mix ANSAR 8100 Herbicide at the rate of 3 to 7 pounds, plus 1 to 2 quarts of a suitable surfactant in 100 gallons of water. Make spot applications on unwanted vegetation, spray thoroughly, but just short of run-off. Use spray equipment that gives good low volume coverage. If regrowth occurs, reapply as required.

LAWN AND ORNAMENTAL TURF: ANSAR 8100 Herbicide is useful for control of dallisgrass, sandbur, bahiagrass, nutsedge, crabgrass, chickweed and wood sorrel with little or no injury to tolerant lawn grasses. On new lawns do not treat until after three mowings. Tolerant grasses may be temporarily discolored. Zoysia grasses, bluegrasses and bermuda grasses are quite tolerant. Do not use on St. Augustine or centipede grasses.

Mow lawns 1 to 1½ inches high before treatment. Mix 1½ ounces of ANSAR 8100 Herbicide in 5 gallons of water, containing 2 to 3 fluid ounces of a suitable surfactant. This will make enough spray material when used as a spot application to cover a total of 1,000 sq. ft. Spot spray thoroughly to wet all undesirable plants. Repeat applications, 10 to 14 days apart, may be needed for good control.

ANSAR 8100 Herbicide is manufactured by The Ansul Company, Marinette, Wisconsin 54143.

Minor Wording Changes as Follows:

1. Under WARRANTY, the disclaimer statement has been changed in accordance with that accepted by EPA on June 1, 1972 and which now appears on our other product labels.
2. Under MIXING INSTRUCTIONS, the statement 'must be thoroughly dissolved' is changed to 'is completely water soluble'. Also, the word 'reservoir' is changed to 'tank' and a statement concerning potential corrosiveness has been added as follows: Although ANSAR 8100 Herbicide is only moderately corrosive, do not use in galvanized or aluminum equipment.
3. Under COTTON, in the 2nd line, 'barnyardgrass' was deleted. 'Of cotton' was added after per acre in the 6th line.
4. Under NON-CROP, the weeds controlled statement was changed to 'johnsongrass, nutsedge and certain other weeds'. Reference to barnyardgrass and others was deleted.
