PERMA-GUARD<sup>®</sup> PYRETHRIN INSECT CONTROL SPRAY S-20-C

ACTIVE INGREDIENTS:

Pyrethrins	4.75
Petroleum Distillate	16.25
*Piperonyl Butoxide technical	47.50

INERT INGREDIENTS:

Ethoxylated Fatty Amine	31.50
-------------------------	-------

TOTAL 100.00

\*Equivalent to 38.00 of (butylcarbityl)  
(6-propylpiperonyl) ether and 9.50 of  
related compounds.

PERMA-GUARD S-20-C can be safely used in milk stables, barns, barns, restaurants, canneries, and bakeries. This spray will knock down and kill flies, roaches, ants, fleas and silverfish. All of the active ingredients composing PERMA-GUARD S-20-C have been exempted by the proper authorities from the requirements of a tolerance for residues when used on growing crops.

DIRECTIONS:

For spraying: Dilute with water in the proportion of 1 part water to one part of this concentrate. This bottle makes one gallon of spray.

Use PERMA-GUARD S-20-C spray in any type of hand or power atomizer and for areas where flies, roaches, ants, fleas and silverfish feed or congregate.

CAUTION

When using this spray all food and feed should be protected from contamination and all food handling equipment or surfaces should be well protected or cleaned prior to re-use. Keep out of reach of children.
