**DIRECTIONS FOR USE**

It is a violation of Federal and State Law to use this product in a manner inconsistent with its labeling.

The components of this product are Pyrethrins, Piperonyl Butoxide, and Diatomaceous Earth.

**ON THE FOLLOWING CROPS:** This dust may be used on the following crops growing outdoors or in green houses, up to and including the day of harvest. When applied according to use, cautions, and directions, PERMA-GUARD GARDEN and PLANT INSECTICIDE may be used where resistant insects are a problem. When applying this dust, best results are obtained when the plants are damp. This material should be applied uniformly to insure both upper and lower leaf surfaces are covered. Rates vary on insect populations, and foliage thickness, but will obtain adequate control at one to three pounds of PERMA-GUARD GARDEN and PLANT per acre for the insects listed on this label. For large area application, the use of electrostatic duster result in better coverage per acre.
