

Active Ingredient:

Phenylmercury ammonium acetate 30%

Inert Ingredients: 70%

Mercury as Metal 18%

Sold For Manufacturing Use Only
DO NOT USE ON GARMENT FABRICS

DANGER
POISON

KEEP OUT OF THE REACH OF CHILDREN.

Antidotes

HANDLING PRECAUTIONS: Do not get on skin or clothing when handling this product or its diluted solutions.

~~The use of rubber gloves is recommended. Always wash~~
hands promptly after handling solutions and before eating. Do not get in eyes. Wear goggles. May produce delayed chemical burns. Do not breathe the spray mist. Keep concentrate away from foods, humans, pets and livestock.

If Swallowed. Give milk or white of egg beaten with water, then a tablespoonful of salt in a glass of

~~water.~~
Repeat milk or white of egg beaten with water. Call a Physician Immediately.

If on Skin. Wash immediately with soap and warm water.

If in Eyes. Flush with water for at least fifteen minutes, and get medical attention.

May be fatal if swallowed or absorbed through the skin.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.

PMA-30

INDUSTRIAL FUNGICIDE AND BACTERICIDE

DO NOT USE ON GARMENT FABRICS

PMA-30 is a clear liquid with a slightly alkaline reaction and an ammoniacal odor. It is completely water soluble. PMA-30 is a solution of phenylmercury acetate in ammonia.

PMA-30 is offered as a fungicide and bactericide for general industrial use where its superior antimicrobial activity will warrant its use. It is an effective fungicide in water base paints, such as those based on acrylic, vinyl acetate and styrene-butadiene polymers. It is effective in protecting fibrous materials such as fiber board, paper board, etc. from mildew.

PMA-30 is a carefully manufactured product relatively free of manufacturing impurities which can lower the stability and effectiveness of phenylmercury acetate solutions.

Recommendations:

Paints: For mildew resistance, add 0.35 - 0.50% on the total weight of the paint. For shelf protection (in the can or in storage before use), add 0.03 - 0.15% on the total weight of the paint.

Fibrous products: Add 0.05 - 0.20% on the weight of the fibrous stock when slurried before forming the sheet. For slime control, use 3/4 to 3 1/2 ounces per ton of paper as required for the particular paper mill conditions. Add to the white water system at or just prior to the point of infection by gravity feed, pump or flow meter device directly from the original containers.

WARNING:

PMA-30 is not to be employed in water systems going eventually to human use or consumption, nor on fibrous materials to be used in contact with human or animal food.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.
