Inert Ingredients	80.00%

Distributed by
BAIN Pest Control Service
Lowell, Mass.

*Consists of 4.80% (butylcarbityl)
(6-propylpiperonyl) ether and 1.20%
of related compounds.

BACK LABEL

A highly effective combination of Pyrethrins and Piperonyl Butoxide utilizing a different principle of Aerosol treatment. This two ounce unit is sufficient to treat an area equal in size to that which can be treated by a conventional twelve ounce aerosol, i.e. 80,000 cubic feet or more than 80 rooms 10' X 10' X 10' for flies and other flying insects.

TO KILL FLIES, MOSQUITOES, GNATS:

Remove protective cap, hold container upright, aim away from you, and moving about room to be treated push button seven times for each 1,000 cubic feet (10' X 10' X 10') aiming spray upward and spraying in a different area of the room each time button is pushed. It is unnecessary to hit flying insects directly as the air-borne mist will remain suspended for some time and kill insects as they fly through it. Keep windows and doors closed for 15 minutes after spraying. Double the dosage to kill hornets, wasps and more hardy insects, or spray directly on crawling insects such as roaches, ants and silverfish.

CAUTION:

Cover fish bowls while spraying.
Do not store above 120° F.
Do not puncture or incinerate container.

CONTENTS: NET WEIGHT 2 OUNCES.
