DIRECTIONS

13/19/11

effice. SPACE SPRAY: For rapid control of Houseflies, Fruit Flies, Mosquitoes, Flying Moths (Millers) and Gnats: Use a good sprayer adjusted to deliver a fine mist and direct the spray toward the upper portions of the enclosure, filling the room with mist. Use 1/2 to 1 ounce of spray for each 1,000 cubic feet of space. Remove pets, birds, and cover fish aquariums before spraying. Whenever possible, vacate area and keep doors and windows closed for 10 minutes after application. Ventilate before reoccupying.

SURFACE SPRAY: To control Roaches, Silverfish, Crickets, Spiders, Clover Mites, Scorpions, Cheese Mites, Cheese Skippers, Spider Beetles, use Pyrenone Industrial Spray in a good machine adjusted to deliver a coarse droplet spray using approximuly 1 gallon of material to each 750 square feet of surface. Spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

Against Ant Infestations, treat shelves, cabinets, and storage areas; spray ant runs, trails, base-1 boards, thresholds and other places of entry, and treat nests liberally.

To Control Bedbugs effectively, apply liberally to top, ends, sides and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frames, directing the liquid into all cracks and lock joints. Treat walls, baseboards, moldings, floors, closets and bedroom furniture, picture frames, with particular attention to protected bedbug hiding and breeding places.

To Control Carpet Beetles effectively, apply to floor areas and baseboards. Spray directly into cracks, crevices, and under carpets where insects may be found. Treat both the underside and top side of infested carpets. Spray inside of trunks. closets and infested areas of shelving.

INDUSTRIAL SPRAY

EPA Reg. No. 6414-4

This formulation is an effective, fast acting insecticide that kills the accessible or exposed stages of:

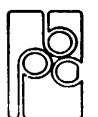

Flies Roaches Bed Bugs Spiders Clover Mites Fruit Flies Ants Wasps Mosquitoes Crickets Cheese Mites Hornets Flying Moths Scorpions Silverfish Gnats

It is highly useful for insect control in Residences, Institutions, Public Buildings, Hospitals, Hotels, Restaurants, Stores, Theaters, Food Processing Plants, Bakeries, Grain Mills, Dairies, Breweries, Bottling Plants, Warehouses, Trucks and other situations where an insecticide with a high degree of effectiveness is required.

ACTIVE INGREDIENTS	. 100 %
Pyrethrins	0.3
	1.5
Petroleum Distillate	98.2
*Equivalent to 1.2% of (butylcarbity)) (6-propyl-
piperonyl) ether and to 0.3% of related	compounds.

VAPOR SPRAY: Pyrenone Industrial Spray is a potent spray that permits its use as a fog or vapor treatment in special electric, steam or compressed air equipment. Use in accordance with manufacturers' directions for the individual type of applicator selected. Dosages vary with different generators, but many such applicators are designed to give most effective results when the material is used at 1 pint to each 8,000-15,000 cubic feet of space. In all cases, dosage should be sufficient to fill thoroughly the enclosure with fog or vapor. Insects controlled will be the same as given for "Space Spray" above.

AS A CONTACT SPRAY: Pyrenone Industrial Spray is also very effective when used as a contact spray against mosquitoes, gnats, wasps, hornets, skippers, scorpions and cheese mites. When these insects are present contacting them with a fine mist will provide immediate kill. Spraying walls, ceilings, lights, moldings, screen doors and door frames, beams and light cords will make these locations unfavorable as resting or hiding places for these insects.
