LONE STAR 14% PROTEIN HI-PRO MIN
WITH RABON ORAL LARVICIDE

To prevent the development of Horn Flies, Face Flies, House Flies and Stable Flies in the manure of treated cattle. House Flies and Stable Flies in the manure of treated horses.

ACTIVE INGREDIENT	BY WEIGHT
Tetrachlorvinphos (2-chloro-1-(2,4,5-trichlorophenyl) vinyl dimethyl phosphate	0.155%*
INERT INGREDIENTS	99.845% **

TOTAL	100.000%

* Each pound contains 0.70 grams of RABON.
** Refers only to ingredients which are not larvicidal.

GUARANTEED FEED ANALYSIS

Crude Protein, not less than	14.00%
Crude Fat, not less than	1.00%
Crude Fiber, not more than	6.00%
Calcium (Ca), not less than	2.20%
Calcium (Ca), not more than	2.50%
Phosphorus (P), not less than	2.00%
Manganese (Mn), not less than	0.012%
Salt (NaCl), not less than	24.00%
Salt (NaCl), not more than	27.00%
Vitamin A, not less than	9,000 IU/LB
Vitamin D3, not less than	1,800 IU/LB

FEED INGREDIENTS

Plant protein products, grain products, processed grain by-products, animal protein products, salt, cane molasses, dicalcium phosphate, magnesium oxide, calcium carbonate, vitamin A acetate, D-activated animal sterol (source of vitamin D3), sodium selenite, manganese sulfate, zinc sulfate, iron sulfate, copper sulfate, ethylenediamine dihydriodide, cobalt carbonate.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

CAUTION

Harmful if swallowed. Avoid contact with skin and eyes. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating or smoking. If in eyes, wash with plenty of water. If irritation persists, get medical attention. Wear long-sleeved shirt and pants; chemical resistant gloves; shoes and socks for protection when handling.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not contaminate water when disposing of equipment washwater.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Feed free choice in covered feeders to beef cattle, dairy cattle or horses. Provide one feeding station per 15 to 20 head of animals. Animals should consume an average of 1.6 ounces per 100 pounds of body weight per day (1 pound per 1000 pounds). This will supply the recommended average intake of 70 mg. of RABON Oral Larvicide per hundred pounds of body weight. Animals should not be starved for minerals before feeding Lone Star 14% Protein HI-PRO-MIN with RABON Oral Larvicide but OMIT all salt from other feed after the program is started. Do not feed free choice sources of salt or mineral containing salt in any form. Place near watering and loafing areas.

If consumption is above 1 pound per 1000 pounds of body weight per day, reduce the number of feeding locations or relocate. If consumption is below 1 pound per 1000 pounds of body weight per day, increase the number of feeding locations. Begin feeding in the spring before flies begin to appear, and continue feeding throughout the summer and the fall.

Lone Star 14% Protein HI-PRO-MIN with RABON Oral Larvicide may be fed up to slaughter and to lactating dairy cows.

Lone Star 14% Protein Hi-Pro-Min with RABON Oral Larvicide prevents the development of horn flies, face flies, house flies and stable flies in the manure of treated animals but is not effective against existing adult flies. When starting a feeding program during the fly season, it may be necessary to use other control measures to reduce the population of existing adult flies.

Supplemental fly control measures may be needed in and around cattle lots and buildings to control adult house flies and stable flies which can breed not only in cattle and horse manure but in other decaying vegetable matter or silage on the premises. In order to achieve optimum fly control, use this product in conjunction with other good management and sanitation practices.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. STORAGE: Store in a dry place. CONTAINER DISPOSAL: Completely empty bag into feeding equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.
