

DIRECTIONS FOR SANITIZING

Use 1 ounce of PLEXIDYNE to each 5 gallons of water and immersion time of utensils should be a minimum of 1/2 minute

Plexidyne is an excellent manual detergent sanitizer for use in dairies, food processing plants and food serving establishments. It is excellent for use in problem areas for mold and odor control. Use 12 1/2 PPM on non-porous surfaces 25 PPM on porous surfaces. Consult health authorities for local regulations concerning sanitization.
