bowlene®

cleans, disinfects, deodorizes

FLUSH TOILET. Sprinkle BOWLENE above water line. Let stand a few minutes, then flush. Two or three applications a week will maintain clean bowl in normal water areas. In hard water areas, or to remove stubborn stains, repeat, allowing BOWLENE to soak. Swabbing should be necessary only in extreme cases, or first time you use BOWLENE. To disinfect, use 1/2 cup and swab solution over inner surfaces of bowl. Let stand 15 minutes.

CAUTION: Do not use for bathtubs, washbowls, any enameled surface, or with chlorine bleaches. Harmless to plumbing and septic tanks. Rinse empty container thoroughly with water and discard.

DANGER

**CONTAINS SODIUM BISULFATE
HARMFUL OR FATAL IF SWALLOWED.**

ANTIDOTES: *EXTERNAL* - Flood surface with water immediately. Use soap freely. Cover with moist magnesia or baking soda. *EYES* - Causes eye damage, do not get in eyes. - Flood with water for 15 minutes. *INTERNAL* - Drink magnesia, chalk, wall plaster or softened soap - in milk or raw egg. Call physician.
