- 0.60% \*Technical Piperonyl Butoxide
- 1.00% N-Octyl Bicycloheptene Dicarboximide
- 0.50% O,O-Diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate
- 94.60% Petroleum Distillates

3.00% Inert Ingredients

\*Equivalent to 0.48% (Butylcarbityl) (6-Propyl-Piperonyl) Ether and 0.12% of Related Compounds.

Guarantee: Your money refunded if directions are followed and infestation is not relieved.

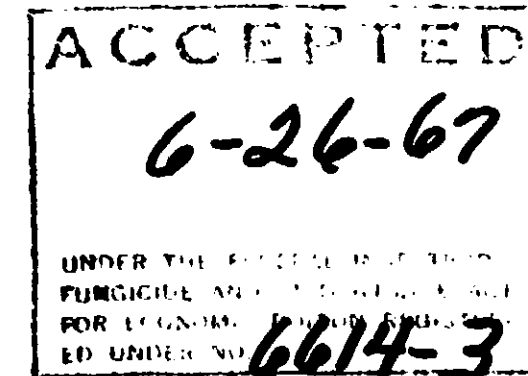

Directions:

Use Roach Ban-D as a spot treatment for roaches along cracks, baseboards, crevices, around and under refrigerators and cabinets.

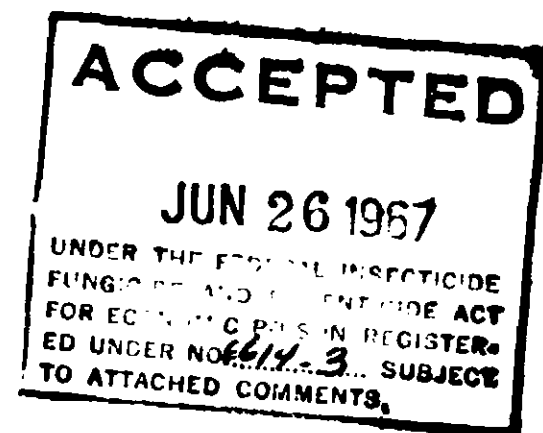

- Step 1. Holding container about 12" from surface to be treated, apply spray at the rate of about 1 foot per second. Spray cracks, baseboards, crevices, around and under refrigerator and cabinets.
- Step 2. After allowing 4 to 8 hours for spray formula to work, place tape in positions along edges of the area sprayed, around baseboards and across any possible entry or passageway routes used by roaches.
- Step 3. Spray the tape.
- Step 4. Repeat Step 3 at least once a month.

Precaution

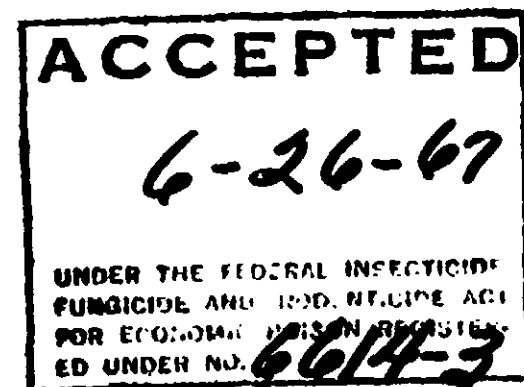

Select an inconspicuous area for placement of the tape when possible, since removal will show slight change of color beneath tape. Do not apply to or allow spray to come in contact with food, animals or human beings. Avoid contact or exposure of the skin to the vapors or liquid. Do not smoke while using.
