**GERMICIDAL LIQUID DETERGENT  
—PHENOL—**

Cleans, Sanitizes, Disinfects and Deodorizes all surfaces  
in one operation.

**ACTIVE INGREDIENTS**

* POTASSIUM SOAPS.....	17%
ISOPROPANOL.....	4%
ORTHO-BENZYL PARA-CHLOROPHENOL.....	3%
TETRASODIUM SALT OF ETHYLENE DIAMINE TETRAACETIC ACID...	1%

\* THE SOAP CONTAINS POTASSIUM LAURATE, POTASSIUM MYRISTATE,  
AND OTHER VEGETABLE OIL SOAPS.

**INERT INGREDIENTS:**

WATER.....	74%
OIL OF WINTERGREEN.....	1%

**CAUTION** KEEP OUT OF REACH OF CHILDREN.  
SEE OTHER PRECAUTIONS ON SIDE PANEL.

# GLD

## GERMICIDAL LIQUID DETERGENT

Solutions of GLD may be applied with a mop or sprayer. The loosened dirt and soil is best removed by rinsing with clear water, and then taken up with a mop or squeegee.

For non-resilient floors such as terrazzo, tile, marble, marble-magnesite, flagstone, terra cotta, granolithic, travertine, etc., mix one part of GLD with 20 to 40 parts of hot or warm water depending upon the amount of soil on the surface. If the floors are extremely soiled use 1 part to 10 parts of water until the floor has an improved appearance. After that a more dilute solution may be used.

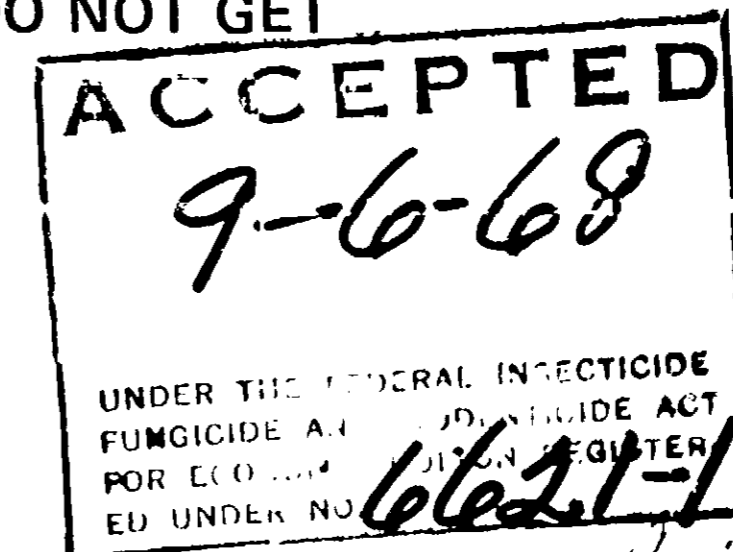

For Resilient Surfaces such as rubber, linoleum, asphalt tile, plastic, cork, as well as hardwood sealed or varnish floors use 1 part GLD to 30 parts of hot or warm water. For oil soaked floors or for dance floors use 1 part GLD to 10 parts of hot water. Allow to remain on the surface for several minutes before taking up with mop or squeegee.

### CAUTION

AVOID CONTAMINATION WITH FOOD STUFFS. AVOID CONTACT OF CONCENTRATE WITH SKIN. DO NOT GET IN EYES.

# GLD

## GERMICIDAL LIQUID DETERGENT

Excellent for terrazzo, tile, marble, composition, asphalt tile, wood, linoleum, and all types of floors.

GLD may be used any place where it is desired to have floors, walls and other surfaces clean and sanitary as well as free from odors.

GERMICIDAL LIQUID DETERGENT

Excellent for terrazzo, tile, marble, composition, asphalt tile, wood, linoleum, and all types of floors.

GLD may be used any place where it is desired to have floors, walls and other surfaces clean and sanitary as well as free from odors.

GLD is a definite disinfectant having a phenol coefficient of 4. It is not only excellent for sanitizing but it is equally efficient for reducing the fungi count. When diluted 1 part to 40 parts water, it is capable of killing the spores of *T. interdigitales*. Thus reducing the hazard of athlete's foot as well as other infectious diseases on the floor. It is also efficient for preventing mildew and mold as well as getting rid of many odors due to decomposition of organic matter.

GLD may be used in either hard, soft, hot or cold water.
