

PINE OIL DISINFECTANT

Made from steam-distilled Pine Oil and soap.

Dissolves readily in water to form a uniform milky emulsion which leaves a pleasant "piney" odor.

Excellent for institutions, school buildings, theatres and factories. On the farm, Pine Oil Disinfectant is ideal for spraying of chicken coops, stables, kennels, etc.

DIRECTIONS:

For general disinfecting, use a 1% solution (approximately 4 oz. to 3 gallons of water). Apply to floors, toilet rooms, urinals, water closets, etc. Pine Oil disinfectant can also be added to scrub water; will leave surfaces clean and fragrant.

COMPOSITION:

Active Ingredients:		
Steam Distilled Pine Oil	90%	
Soap		
Water —not over—	10%	
Phenol Coefficient	5.0 F.D.A.
