

MINUS 24

WEED AND BRUSH CONTROL

CONTAINS DRIFT REDUCER

DOES NOT CONTAIN 2,4, D

DIRECTIONS

To control most weeds and grasses for extended periods on non-cropland areas such as industrial plant sites, parking lots, loading ramps and around storage buildings and similar non-crop areas, apply 1-4 gallons per 1000 square feet of Minus 24 with Drift Reducer after the most predominant weeds have emerged. No agitation is required. Minus 24 Weed and Brush Control can be applied with standard spray equipment. For treating small areas, a tank type hand sprayer or sprinkling can may be used.

NOTE: Users should consult State Agricultural Experiment Stations or Extension Service Weed Specialists for recommendations as to use of Minus 24 Weed and Brush Control in their particular area or write to us.

IMPORTANT: Do not apply directly to, or otherwise permit Minus 24 Weed and Brush Control to contact desirable, woody or herbaceous plants or areas where their roots may extend. Avoid spray drift to such plants (coarse sprays are less likely to drift). Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes (or do not use same equipment for other purposes). Do not store near fertilizers, seeds, insecticides or fungicides. Do not reuse this container. Destroy when empty.

Minus 24 Weed and Brush Control is toxic to fish and wildlife. Birds and other wildlife in treated areas may be killed. Keep out of lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not contaminate water used for irrigation or domestic purposes. Apply this product only as specified on this label.

WARNING: KEEP OUT OF REACH OF CHILDREN.
SEE OTHER PRECAUTIONS ON SIDE PANEL.

ACTIVE INGREDIENTS:

Petroleum oil	96.07%
Bromacil (5-bromo-3-sec-butyl-6-methyluracil)	0.97%
