Dear Mr. Harding:

Subject: Amendment - Correct Labeling  
Arico Roach 6 Ant Spray Contains Diazinon & Pyrenone  
EPA Registration No. 6626-47  
Your Submission Dated November 17, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling.

1. Place the "Note to Physician" immediately following the Statement of Practical Treatment.
2. Any products where precautionary labeling appears on other than the front panel must bear the following statement on the front panel:

See Back/Side Panel for Additional Precautionary Statements.

3. Since you did not add the statement prohibiting use in U.S. Department of Agriculture (USDA) Meat and Poultry Plants (Item No. 3 in the Agency's letter dated October 31, 1988), we assume you have applied to USDA requesting use in these areas. Please confirm.

	100.000%

\*Equivalent to min. 0.208% (butylcarbityl) (6-propylpiperonyl) ether and 0.052% related compounds.

\*\*0,0-Diethyl 0-2 (isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate

PYRENONE - Registered Trademark of Fairfield American Corporation

**KEEP OUT OF REACH OF CHILDREN  
WARNING**

NOTE TO PHYSICIAN: Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be used, but only in conjunction with atropine.

DO NOT TRANSPORT OR STORE UNDER 32°F

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Spray infested surfaces until wet. Do not use as a space spray.

Do not use in serving areas while food is exposed.

Remove pets and cover or remove fish bowls before spraying. Do not allow children to contact treated surfaces until surfaces are completely dry.

**ACCEPTED:  
with COMMENTS:**

MANUFACTURED BY In EPA Letter Dated;

ATLANTIC RESEARCH LABORATORIES CORP  
29-05 40th ROAD

LONG ISLAND CITY, N.Y. Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

NET CONTENTS: 0626-47

Do not use in food areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms but excluding areas where foods may be prepared or held.

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

**TO KILL: Ants, Crickets, Cockroaches, Silverfish, Spiders.** Spray areas where these pests are found or may hide, including dark corners of rooms and closets, cracks, crevices, along baseboards and door sills and frames, behind and beneath sinks, stoves, refrigerators, cabinets and around garbage cans, plumbing and other utility installations. Pests flushed out of hiding should be sprayed directly. Treat ant trails, nests and points of entry. Repeat treatment as necessary.

**TO KILL: Carpet Beetles.** Spray edges of carpeting and under carpeting and rugs. Make localized application to the floor and baseboards. Spray directly into cracks, crevices, closets and infested areas of shelving. Repeat as necessary.

**TO KILL: Fleas and Brown Dog Ticks, Indoors.** Clean premises thoroughly before treatment. Using a coarse cone or fan spray, treat the entire floor and carpet area. Special attention should be given to cracks, crevices and under carpet and rug edges. Also treat animal sleeping quarters, closets, upholstered furniture (with particular attention to seams), beds, under sofas and other furniture. In animal sleeping quarters bedding should be cleaned or replaced with fresh bedding. Do not use this application in nurseries or any area where infants may sleep. Apply at the rate of approximately 1 gallon to 750 square feet (17.4 oz. per 100 sq. ft.). To avoid reinfestation, pets must be treated simultaneously with an E.P.A. approved insecticide labeled for use on animals. Application should be repeated as necessary. Humans and pets should avoid contact with treated surfaces (rugs, upholstered furniture, etc.) for 4 hours after treatment.

**TO KILL: Flies, Mosquitoes, Small Flying Moths, Wasps.** For outdoor use only as an aid in reducing annoyance from these pests. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures or porches, in garages and other places where these insects alight or congregate.

**TO KILL: Fleas, Chiggers and Ants, Outdoors.** For treatment of localized infestation of these insects in outdoor areas, spray weeds and bushy non-crop areas around the home thoroughly. Avoid spraying desirable plants. For ants, thoroughly wet hills and runways. Repeat applications as reinfestations warrant and as reinfestations occur.

### STORAGE AND

Containers larger than one

Do not contaminate water,

PESTICIDE STORAGE AREA

at room temperature. Avoid

case of spill or leakage, soil

sand, sawdust, earth, fuel

waste. Protect from freezing
