NET 32 FL. OZ.  
(1 QT.) 946mL

**ACCEPTED**  
APR 22 1997  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under  
EPA Reg. No. 6659-3

**Spray Nine®** digs out tough soils with "spray on-wipe off" ease from stainless steel, plastic, tile, rubber, vinyl, fiberglass, porcelain, formica and other hard surfaces. Use to clean, disinfect and deodorize hospitals, nursing homes, schools and other institutions where housekeeping is of prime importance. When used as directed, **Spray Nine** will disinfect hard, non-porous surfaces such as walls, floors, tables, chairs and countertops. **Spray Nine** kills many bacteria and destroys odors.

**Directions For Use:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Test on inconspicuous area to determine colorfastness and surface integrity before use. Do not use on glass.

**TO CLEAN:** 1. Spray on soiled surface. 2. Wipe immediately with a clean damp sponge or cloth.

**TO DISINFECT:** 1. Clean surface as instructed above. 2. Repeat application making sure to wet all surfaces thoroughly. 3. Allow to stand for 45 seconds (30 seconds for HIV-1) minimum. 4. Wipe off with a clean damp sponge or cloth and rinse thoroughly.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normal sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

Container may be refilled with **Spray Nine**. Do not reuse empty bottle with any other product. To dispose, triple rinse and offer for recycling or wrap and put in trash.

\*Kills HIV-1, *Salmonella choleraesuis*, *Staphylococcus aureus* and *Pseudomonas aeruginosa*.

**KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in health care settings (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:**

**PERSONAL PROTECTION:** When handling items soiled with blood or body fluids, use disposable latex gloves, gowns, masks or eye coverings. **CLEANING PROCEDURES:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before disinfection. **CONTACT TIME:** Allow surface to remain wet for 30 seconds. **DISPOSAL OF INFECTIOUS MATERIALS:** Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.

### PRECAUTIONARY STATEMENTS

Hazards to humans and domestic animals. Caution. Causes eye irritation. Avoid contact with eyes, skin or clothing. If in eyes or on skin, flush with plenty of water. Call physician immediately. The use of rubber gloves is recommended. All treated items which come in contact with food must be rinsed with potable water before reuse. When spraying, avoid contamination of food. Keep from freezing.
