DALCO LINREZ

Another PROVEN SANITARY PRODUCT

Dalco Linrez is an advanced insecticide providing control of the following insects by residual and contact action. Residual action is obtained when applied as a coarse spray or by brushing on surfaces treated. Quick knock-down and kill is effected by contact application.

Recommended for control of the following insects: Roaches, Waterbugs, Spiders, Silver Fish, Flies, Mosquitoes, Gnats and certain species of Ants.

ACTIVE INGREDIENTS 100%

Petroleum Distillates
Piperonyl Butoxide-Technical*
Gamma isomer of Benzene Hexachlorid
from Lindane
Pyrethrins

*(Butylcarbityl) (6-Propylpiperonyl)
ether and related compounds.

CAUTION: Keep out of reach of children. Harmful if swallowed. See side panel for additional cautions.

Directions

To obtain residual action DALCO LINREZ may be applied with a brush or as a coarse spray to moisten the surface, using one quart to approximately 250 sq. ft. of space.

For Surface Treatment:

1. To Kill Flies, Mosquitoes and Gnats: Apply as a coarse spray or brush to surface where these insects are commonly seen such as screen, door, walls, windows and frames, ceilings, and loading docks, making sure surfaces are thoroughly moistened. Exterior surfaces, because of effects of weathering should be treated frequently. Repeat treatment as often as necessary. Do not spray on wallpaper.

2. For Roaches, Silver Fish and Spiders: Spray liberally around refrigerators, sinks, cabinets, shelving, under side of tables, all cracks and crevices, around baseboards, moulding, and other wood-work, drains, plumbing and sanitary facilities, hitting as many insects as possible as they emerge. Also around heating pipes, pipe openings, beams and rafters, storage places of records and printed matter, as well as accessible interiors of vending machine and water cooler motors. Avoid contact of foodstuffs and food handling equipment. Repeat treatment as often as necessary.

3. Ants: Certain species of ants can be controlled with a thorough spraying with DALCO LINREZ. Apply the spray to runways and areas visited, contacting as many of them as possible. Spray baseboards, door and window frames, sills, undersides of tables and chairs, pantry shelves, cupboards, and any points through which they may gain entrance into premises. Control of colonies may be obtained by pouring into ant hills and closing over with earth. Repeat treatment as often as necessary.
