Terrance Hubert, Ph.D. U.S. Fish and Wildlife Service Arlington Square Bldg., MS 725 Washington, DC 20240

Subject:

Application for Pesticide Notification (PRN 98-10)

TFM-HP Sea Lamprey Larvicide

EPA Reg. No. 6704-45

Application Dated December 14, 2010

TFM Bar

EPA Reg. No. 6704-86

Application Dated December 14, 2010

#### Dear Dr. Hubert;

The Agency is in receipt of your filling of a revised Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-6736 or electronically at Edwards.joanne@epa.gov.

Sincerely.

Joanne S. Edwards

Insecticide-Rodenticide Branch

Attachment 1 to Form 8570-1, Notification of revised label per PR Notice 2007-4 and other administrative changes for TFM Bar, Reg. No. 6704-86

Notification of label changes per PR Notice 2007-4 and PR Notice 98-10. The following revisions were made to this label:

### Page 2 of Label

- Deleted "Manufacturer by: Bell Laboratories, Madison, WI 53704," because the label already lists the person for whom the product is produced, and according the EPA Label Review Manual only one name and address is required, either the producer, registrant or person for whom produced.
- 2. Deleted "12455-WI-01" and replaced it with a space holder line because unique EPA Establishment numbers are not required for the EPA "generic" version of the label. However, the current producer will list their unique EPA establishment number on the actual container labels of all product before shipment.
- 3. Deleted "2" in Net Contents and replaced it with a space holder line because actual net contents are not required for the EPA "generic" version of the label. However, the current producer will enter the net contents on the actual container labels of all product before shipment.

## Page 5 of Label

1. Deleted the version number of the Sea Lamprey Control Document because the version changes more frequently than the label, but the document number is always the same.

Page 7 of Label (Container Disposal statement revised as per PR Notice 2007-4)

- 1. Deleted "Dispose of empty plastic wrappers and packing cartons in a sanitary landfill, or if allowed by state and local authorities, by burning. If burned, stay out of smoke."
- 2. Added "Offer empty plastic wrappers and packing cartons for recycling if available or dispose of in a sanitary landfill or by incineration, or by other procedures allowed by state and local authorities."

This notification is consistent with the guidance in PR Notice 2007-4 and PR Notice 98-10. No other changes have been made to the labeling or the Confidential Statement of Formula for this product. It understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if the amended label is not consistent with the requirements of PR Notice 2007-4 and PR Notice 98-10, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Subject: Notification of revised label per PR Notice 2007-4 and other administrative changes for TFM Bar, Reg. No. 6704-86

To the Office of Pesticide Programs,

The purpose of this submission is to notify the Agency of a revised label for TFM Bar, Reg. No. 6704-86 per PR Notice 2007-4, and other minor administrative changes. Revisions are detailed on Attachment 1 of Form 8570-1 and on the marked-up version of the label. Enclosed you will find:

- Form 8570-1 and Attachment 1
- Revised product label marked-up version
- Revised product label final version

If you have questions, or need additional information, please contact me or Jane Rivera by phone at (608)781-6214, or by e-mail at <u>jerivera@usgs.gov</u>.

# RESTRICTED USE PESTICIDE

Due to Acute Eye Irritation, Acute Oral Toxicity and Aquatic Organism Toxicity, Need for Specialized Equipment and Highly Specialized Applicator Training.

For retail sale to, and use only by, USDI, FWS, State Fish and Game, Fisheries and Oceans Canada, and Provincial Certified Applicators trained in sea lamprey control or persons under their direct supervision.

## **TFM BAR**

Active Ingredient:	
TFM, 3-Trifluoromethyl-4-nitrophenol	.23.0%
Inert Ingredients:	77.0%
TOTAL:	100.0%

KEEP OUT OF REACH OF CHILDREN		
DANGER	Ñ	

NOTIFICATION 3 AN - 5 2011

## FIRST AID

Have label with you when obtaining treatment advice.

If swallowed	<ul> <li>Call a poison control center or doctor immediately for treatment advice</li> <li>Have person sip a glass of water, if able to swallow</li> <li>Do not induce vomiting unless told to do so by poison control center or doctor</li> </ul>
If on skin or clothing	<ul> <li>Take off contaminated clothing.</li> <li>Rinse skin immediately, with plenty of water, for 15-20 minutes.</li> <li>Call a poison control center or doctor immediately for treatment advice.</li> </ul>

	6		
i	1		

If inhaled	<ul> <li>Move person to fresh air.</li> <li>If person is not breathing, call an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.</li> <li>Call a poison control center or doctor immediately for treatment advice.</li> </ul>
If in eyes	<ul> <li>Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> <li>Call a poison control center or doctor immediately for treatment advice.</li> </ul>

See Left Panel for additional precautionary statements.

## PRECAUTIONARY STATEMENTS

## HAZARDS TO HUMANS AND DOMESTIC ANIMALS

## DANGER

**Acute Hazards:** Corrosive. Causes irreversible eye damage. May be fatal if swallowed. Harmful if absorbed through skin or inhaled.

**Hazard Avoidance:** Do not get in eyes, on skin, or on clothing. Avoid breathing vapors. Wear protective clothing as listed under "Personal Protective Equipment." Wash thoroughly with soap and water after handling and before eating or smoking. Remove contaminated clothing and wash before reuse.

## PERSONAL PROTECTIVE EQUIPMENT:

### Handlers must wear:

- Protective eyewear (goggles, face shield, or safety glasses)
- Long-sleeved shirt and long pants
- Chemical-resistant gloves (such as Natural Rubber, selection Category A)
- Socks and shoes

## **User Safety Requirements:**

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions are provided for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

# **User Safety Recommendations:**

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Users should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

#### **ENVIRONMENTAL HAZARDS**

This chemical is toxic to fish and aquatic invertebrates. Nontarget organisms (such as freshwater clams and mussels) may be killed at recommended rates. Directions for use must be strictly followed to minimize hazards to non-target organisms. **Do not** contaminate water by the cleaning of equipment or disposing of equipment washwaters.

# **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### **READ THIS LABEL:**

Read the entire label and Sea Lamprey Control Document No. SLC-92-001[Standard Operating Procedures for Application of Lampricides in the Great Lakes Fishery Commission Integrated Management of Sea Lamprey (*Petromyzon marinus*) Control Program] for correct rates of application. This product must be used strictly in accordance with both the label's precautionary statements and applicable use directions, as well as with all applicable State and Federal laws and regulations.

#### **GENERAL INFORMATION:**

This product contains a fast-acting fish toxicant which kills sea lamprey larvae in 1-2 hours. The mode of action is uncoupling of oxidative phosphorylation. As many types of nontarget species are potentially vulnerable to TFM, it is necessary to use care and to follow the requirements of this label to minimize impacts.

#### **USE RESTRICTIONS:**

#### Use Pattern:

TFM Bars may be used for control of sea lamprey (*Petromyzon marinus*) in waters in the Great Lakes Basin, the Lake Champlain system and the Finger Lakes. Only apply this product according to this label.

#### Permits:

Obtain any permits needed from local, State, Provincial and Federal wildlife authorities.

#### Potable Water:

At least 24 hours prior to application, notify municipalities and agricultural irrigators that potable and irrigation water will be treated. Agricultural irrigators must turn off their irrigation systems for a 24-hour period during and after treatment. Prior to and during the application of this chemical, take all appropriate actions to notify public water users and municipalities including notification actions specified in the application manual referred to above.

#### **Unauthorized Personnel:**

May not be used by unauthorized personnel.

#### PRE-APPLICATION DIRECTIONS:

## **Pretreatment Surveys:**

Pretreatment surveys are always made to determine abundance of sea lamprey larvae (*Petromyzon marinus*). All waters in the Great Lakes basin, Lake Champlain system and Finger Lakes that are selected for treatment must first be analyzed on site to determine both the minimum concentration of TFM required to kill sea lamprey larvae and the maximum concentration that can be applied without causing undue mortality of non-target organisms. "Analysis" constitutes live animal bioassays, or the use of multiple regression curves relating toxicity test results to on-site determination of pH or total alkalinity and conductivity of the body of water.

#### **Lethal Concentration:**

The concentration of TFM needed to kill a sea lamprey larvae may vary depending upon water chemistry and temperature. Measure volume or flow rate and add the amount of chemical necessary at rates based on the foregoing analysis. Concentration in the body of water must be monitored by spectrophotometric analysis or high performance liquid chromatography.

## **APPLICATION DIRECTIONS**

**Bar Placement:** Suspend each bar at least one inch above the bottom of the stream to permit movement of water on all sides.

**TFM Delivery Rate:** When submerged in water, TFM bars dissolve in approximately 8 to 10 hours at 17 °C and 10 to 12 hours at 12 °C in current velocities 0.09 to 0.12 meter/sec. More rapid velocities will cause the bars to dissolve faster. First, calculate the amount of TFM (grams/hr) needed to supply a lethal concentration to larval sea lampreys in the stream. Then calculate the amount of TFM (grams/hr) released from a TFM bar based on the length of time the bars are expected to last at the prevailing temperature. Divide the amount of TFM needed by the amount released per bar to find the number of bars needed.

1/

#### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

**STORAGE:** Store only in original container, in a cool (85°F or less) dry place inaccessible to children, pets and domestic animals, and where spills and leakage can be contained. If product becomes soft or liquifies due to high temperatures, cooling to below 85°F will return it to a solid state.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal law. If these wastes cannot be disposed of according to instructions in the application manual, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Offer empty plastic wrappers and packing cartons for recycling if available or dispose of in a sanitary landfill or by incineration, or by other procedures allowed by state and local authorities.
