DIRECTIONS FOR USE

Remove protective cap. Aim spray opening away from person. Push button to spray.

FOR HOUSEFLIES, MOSQUITOES AND GNATS: Close all doors and windows. Point nozzle upward. Direct spray mist to all parts of room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

WASPS: Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary.

FOR CRAWLING INSECTS - Roaches, earwigs, grain mites, sowbugs, spiders and centipedes: Spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards, and storage areas. Spray directly on insect where possible.

ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

WARNING. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator. Do not spray in or toward face or eyes. Avoid prolonged inhalation of vapors. In case of skin contact, wash with soap and water. Avoid contamination of feed and food-stuffs. Use as a space spray in food processing plants only when the facility is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Cover or remove fishbowls. Remove all pets from area to be treated.
