

RAT-PEL D

1 2' NUGGETS

KILLS RATS AND MICE

Active ingredient:
Diphacinone
NET WEIGHT 5 LBS

A PELLETIZED RAT & MOUSE BAIT containing diphacinone. Scientifically blended with natural rodent foods for use by Pest Control Operators, Industrial Sanitarians, and by, and under the supervision of Public Health Personnel.

Diphacinone is an anti-coagulant chemical that reduces the clotting ability of the blood and, upon repeated feedings, causes fatal hemorrhage in rats.

DIRECTIONS FOR USE

RATS: Place 4 to 6 ounces of bait in dry run-trainers, next to burrows, in runways, or where rats are accustomed to feed. A lure or unbaited receptacle of bait for a period of not less than 12 days and continue baiting until signs of feeding have stopped.

MICE: Place table-spoonful amounts of bait in shallow containers where mice or signs of mice

are present. Bait should be replaced every 12 days. Bait should be replaced every 12 days.

CAUTION: Bait should be placed in locations not accessible to children, pets, and domestic animals, or in tamper-proof boxes.

In case of poisoning, consult a physician and administer 10 to 20 cc. of 1% solution of sodium bicarbonate. If vomiting is induced, the use of emetics should be avoided. Do not induce vomiting.

Do not feed to livestock or poultry while using. THIS PRODUCT MAY NOT BE BROKEN FOR RESALE.

NOTICE

CAUTION: KEEP OUT OF REACH OF CHILDREN
