

DIRECTIONS FOR USE

General Classification

It is a violation of Federal law to use this product in a manner inconsistent with its labeling

TERMITE CONTROL

Consult the table below to determine the required amount of SMCP 50% CHLORDANE to be added to water for a 1% emulsion:

Amount of finished spray needed	Amount of SMCP 50% CHLORDANE necessary
1 gallon	2 ¹ / ₂ ounces
5 gallons	13 ounces
10 gallons	25 ³ / ₄ ounces
48 gallons	1 gallon
96 gallons	2 gallons

Add water to spray tank, then add required amount of SMCP 50% CHLORDANE. Agitate and spray as directed below.

Buildings Having Basements or Crawl Spaces

Dig a trench along the outside of the foundation walls. In brick or hollow block or concrete foundations, dig a trench to, **but not below**, the footing. Then as the trench is refilled, treat the

soil at the rate of 4 gallons per 10 linear feet **for each foot of depth**. A trench 3 feet deep would require 12 gallons per 10 linear feet.

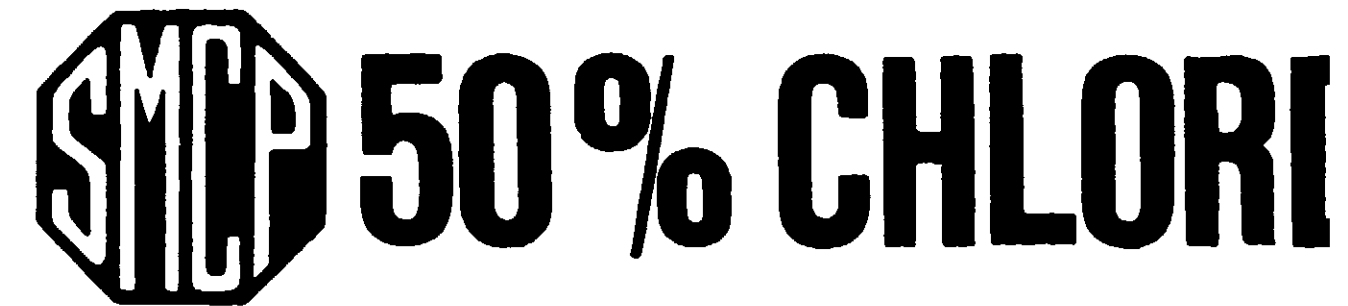

The objective is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment. It is suggested that you consult the State Extension Service for advice.

FIRE ANT CONTROL

For the control of fire ants on home lawns, golf courses, parks, ornamental turf, cemeteries and recreation areas, apply SMCP 50% CHLORDANE at the rate of 1/2 pint in 35 gallons of water to treat 9000 square feet.

Keep children and pets off treated areas until material has been washed into the soil by watering or rain and grass is dry. Do not treat when soil is wet. Do not apply to pasture and rangeland. Do not contaminate food or feed crops.

NET CONTENTS

Emulsifiable Insecticide

ACTIVE INGREDIENTS:

Technical Chlordane*

Aromatic Petroleum Distillates

INERT INGREDIENTS:

TOTAL

*Equivalent to 30.0% Octachloro-4,7-methanotetrahydroindane and 20.0%

KEEP OUT OF REACH OF CHILD

CAUTION
