PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH THE SKIN. DO NOT BREATHE DUST. DO NOT ALLOW TO CONTACT SKIN, EYES OR CLOTHING.

WASH HANDS AND EXPOSED SKIN BEFORE EATING, DRINKING OR SMOKING AND AFTER HANDLING. WASH ALL CONTAMINATED CLOTHING THOROUGHLY BEFORE REUSE.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

This product is highly toxic to bees exposed to direct treatment or residues on plants.

PRECAUTIONS

Do not use on or contaminate fruit, vegetables or other food or feed crops.

Do not apply to humans, animals, clothing or bedding.

Do not contaminate feed or food products or food preparation surfaces, dishes, kitchen utensils and food containers.

IMPORTANT: Read the entire Directions for Use and Disclaimer of Warranties before using this product.

---

STATEMENT OF PRACTICAL TREATMENT

If swallowed - Call a physician or Poison Control Center immediately. If possible, vomiting should be induced under medical supervision. Drink one or two glasses of water and induce vomiting by touching the back of throat with a finger. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person.

If inhaled- Remove victim to fresh air. Apply artificial respiration if indicated.

If on skin- Remove contaminated clothing and wash affected areas with soap and water.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SMCP Insect Dust is for residual pest control in and on buildings and structures and their immediate surroundings. Permitted areas of use include, but are not limited to: houses, garages, trailers, campers, storage sheds and apartment buildings.

#### INDOOR USE

SMCP Insect Dust is intended for application with a shaker or puffer container to hiding and runway areas and those places where pests are found. The amount to be applied will vary with the site, but should usually be in the range of 1/3 to 2/3 ounces of dust per square yard.

Cockroaches, Ants, Crickets, Silverfish and Firebrats: Thoroughly dust all areas where these pests crawl and hide especially cracks and crevices around sinks, stoves, refrigerators and cabinets; behind baseboards; around doors and windows and in attics, basements and crawl spaces. For ants, apply to ant trails and around doors and windows where they may enter premises.

Carpenter Ants: Dust around doors and windows and other places where these pests enter premises. When possible, locate and dust nests and surrounding areas.

Brown Dog Ticks and Fleas in Buildings: Dust infested areas such as pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture and other places where these pests may hide. Old bedding of pets should be removed after treatment of pet area and replaced with clean fresh bedding. Additionally, ensure that pets are treated with an EPA approved product registered for pet use. DO NOT TREAT ANIMALS OR THEIR BEDDING WITH THIS PRODUCT.

Spiders: Dust along and behind baseboards, window and door frames, corners, pipes, storage localities, attics, basements, crawl spaces and other areas where spiders may hide.

Wasps: It is best to treat wasp nests at night when insects are less active and have returned to the nest. Do not wear loose fitting clothing- take necessary precautions to avoid stings. For best results, carefully dust near nest and check one or two days after treatment to ensure complete kill, and retreat if necessary. If possible, remove and destroy nest to prevent hatching of new insects. For ground nests, carefully dust entrance and surrounding areas. Retreat in one or two days if wasp activity is still present. Do not use this product to treat nests overhead.

Sowbugs, Pillbugs, Ground Beetles, Earwigs, Millipedes, Centipedes and Scorpions: Apply around doors, windows and other places where

BEST DOCUMENT AVAILABLE

these pests may enter. Treat baseboards, storage areas, and cracks and crevices, especially in dark, musty areas where these pests may hide.

OUTDOOR USE

Perimeter Treatment: Use SMCP Insect Dust as a residual treatment for control of ants, brown dog ticks, centipedes, cockroaches, crickets, earwigs, firebrats, fleas, ground beetles, millipedes, pillbugs, scorpions, silverfish, sowbugs, spiders and wasps. Make a residual treatment around windows and doors, porches, screens, eaves, patios, garages, under stairways and in crawl spaces and other areas where pests hide.

To help prevent invasion of buildings and structures by the above pests, treat a band of soil and vegetation 6 to 10 feet wide around and adjacent to the building or structure. Also treat the building foundation and crawl spaces where pests are active and may find entrance. Apply thoroughly and uniformly to the band area. Pay particular attention to ant hills and wasp nests in the band area. Wasp nests in trees and shrubs may be treated as noted above.

Insect Dust

Fire Ants: Stir 7 oz of SMCP into 2 gallons of water. Pour a small amount of material around the perimeter of the mound. Apply the remaining volume directly on the mound so as to penetrate insect galleries, using 2 gallons of mixture on mounds 8 inches or larger in diameter. Less mixture can be used on smaller mounds; however, thorough penetration of the insect galleries must be achieved. A second treatment may be necessary if complete control is not obtained.

Do not disturb the mound prior to application. If possible, make applications after a recent rainfall. Applications may not be as effective during hot, dry periods. If possible, treat all colonies in the vicinity. Also, treat colonies which have not yet constructed a mound.

#### STORAGE AND DISPOSAL

**Storage-** Avoid storage at high temperatures. Protect from moisture. Avoid contamination with water, acids or alkalies. Keep container closed. Store in original containers only. Separate pesticides to avoid cross-contamination of other pesticides, fertilizer, food and feed. Keep container in locked storage areas.

**Pesticide Disposal-** Do not contaminate water, food, or feed by storage or disposal. Pesticide wastes are toxic. Improper disposal of excess pesticides, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**Container Disposal-** Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, if allowed by State and Local authorities, by burning. If burned, stay out of smoke.

**NOTICE:** Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied; extends to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
