registered under
EPA Reg. No. 6720-359

seams and folds. The interior of trunks, closets, cupboards, and other storage containers should be thoroughly sprayed. Unless the articles are to be immediately stored in moth-tight containers, treatment should be done once a month. A small spot on the fabrics should be first tested for possible staining.

Stored product insects: (Rice weevil, yellow meal worm, cadelle, common flour beetle, was-toothed grain beetle, angoumois grain moth, Mediterranean flour moth and Indian meal moth—accessible stages.)

In homes: Dispose of all infested products. Shelves and drawers should be cleaned, thoroughly sprayed so as to contact all pests, and covered with shelf paper after allowing shelves to dry. Any utensils that are contacted with spray should be washed before using.

In industrial and commercial facilities: Infested stored food products should be fumigated or treated by other effective methods using an approved product for this purpose. For accessible stages, spray affected areas liberally with coarse wet spray, paying particular attention to areas suspected of harboring these pests. Spray under and around pallets.

Fleas: Apply as a coarse wet spray to floor and floor coverings, cracks, crevices, sleeping quarters of animals, and infested furniture. Repeated applications to the area to insure contact of all fleas are necessary for control.

Brown dog ticks: Spray area so as to directly contact these pests with a coarse wet spray. Spray liberally on floors, floor coverings, bases of walls. Cracks and crevices. Pay particular attention to animal sleeping areas. Animal bedding should be thoroughly treated and allowed to dry before replacing. Repeat as necessary for control.

Carpet beetles: Spray area with a coarse wet spray so as to directly contact these pests. In case of infested upholstered furniture, treat thoroughly interior and exterior. Both the top surface and underside of rugs and carpets should be sprayed thoroughly. Shelves, closets and areas under furniture should be treated. Repeat as necessary for control.

Fleas, mosquitoes, gnats and adult angoumois grain moths, Mediterranean flour moths and Indian meal moths: Close doors and windows. With a manual sprayer adjusted to a fine mist, spray all parts of the room, particularly toward the ceiling, so as to fill the room with mist. When using an electric mixer such as the "FOGMASTER" use a dosage of 1/2 to 1 fluid ounce per 1,000 cubic feet of room space. Vacate premises after treatment. Keep room closed for 10-15 minutes. Sweep and destroy fallen insects; ventilate room.

NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material.
