

DURSBAN* 2E

EMULSIBLE CONCENTRATE

FOR USE BY PEST CONTROL OPERATORS ONLY
FOR RESISTANT AND NON-RESISTANT COCKROACHES

DIRECTIONS FOR USE

SUPERIOR CONCENTRATE 2E insecticide mixes readily with water or oil. Dilute the required amount of CONCENTRATE 2E in water or in a base oil such as deodorized kerosene or No. 2 fuel oil. Mix according to the table in center column to obtain the desired concentration of 0.25% or 0.50% of the active chemical. Use the higher concentration (0.50%) to quickly reduce heavy cockroach infestations and the lower concentration (0.25%) on light infestations.

Use as a spot treatment by applying as a coarse spray or with a paint brush, to areas where cockroaches normally are found. These areas include dark corners of rooms and closets, at the base of walls, in cracks in the wall, behind baseboards, behind and beneath sinks, refrigerators, stoves and cabinets and around drainpipes. Apply in a manner to avoid spray or mist contacting food, feedstuff and water supplies. Dishes and food handling utensils should be thoroughly washed in soap and water if they have become contaminated by the application of this product. Repeat treatment as needed. NOTE: A period of 4 to 7 days after treatment is normally required for maximum effect on cockroaches.
