- tain emergency supply of Atropine 1/100 grain tablets from your physician. Keep on Hand.
- ling or working with Methyl Parathion develop poisoning symptoms.

THE TALES OF TARGET

IF SWALLOWED — Give tablespoonful of salt in a glass of warm water. Repeat until vomit fluid is clear. Have victim fie down and keep quiet.

U. S. D. A. Registration No. 6735-132

INHALATION - Remove patient from contaminated at-

SKIN — In case of contact, remove contaminated cicthing and immediately wash skin thoroughly with soap and water.

EYES — In case of contact, flush immediately with water for at least 15 minutes.

. INFORMATION FOR PHYSICIAN

(Treatment) — Give atropine preferably by injection, grains 1/30 to 1/15 (2 to 4 mg.), at once and every hour or oftener as needed to achieve and maintain full atropinization. Never give morphine. Clear chest by postural drainage. Artificial respiration or oxygen administration may be necessary. Observe patient continuously for 48 hours. PARATHION is a Cholinesterase inhibitor and treatment of poisoning should include the use of ATROPINE, Toxaphene produces central nervous system excitation which responds to the barbituric derivatives.

OBSERVE THE FOLLOWING USE PRECAUTIONS

Do not apply to cucurbits (cantaloupe, cucumber, squash, melons) as injury to the plant may result.

Do not apply during bloom when honey bees or other pollinators are active. Avoid drift to adjoining food and forage crops about to be harvested, or to crops in bloom, or areas occupied by unprotected humans or beneficial animals. Do not apply to feed or forage crops to be fed to dairy animals or to animals being finished for slaughter.

The Federal Food and Drug Administration has set official tolerances for certain pesticide residues. In order that residues on food and forage crops will not exceed established tolerances, use only at recommended rates, and do not apply closer to harvest than specified.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

This product is toxic to fish and wildlife, Keep out of lakes, streams or ponds. Birds feeding on treated areas may be killed. Apply this product only as specified on this label. Do not apply when weather conditions favor drift from areas treated.

ONLY the BEST . . . is fit to be TIDE

READ LABEL BEFORE USING

FOR USE ONLY IN POWER SPRAYERS BY OPERATORS EXPERIENCED OR ADEQUATE-LY TRAINED IN THE APPLICATION OF PARATHION INSECTICIDES.

DIRECTIONS FOR USE

Application should be made only by trained personnel using approved protective equipment. Do not apply with hand equipment. Pour specified amount of this product into nearly filled spray tank. Add balance of water to fill tank. Keep agitator running during filling and spraying operations. Do not allow mixture to stand. If mixture does not mix readily, but tends to separate as an oily layer, do not use as injury to plants may result. Do not combine with wettable powders unless previous use of the mixture has proven physically compatible and safe. Always thoroughly emulsify this product with at least half of total water before adding wettable powder.

SUGGESTED WATER RATES FOR AIRCRAFT AND GROUND APPLICATION. (The actual rate required to provide thorough, uniform coverage varies with plant growth at time of application. Except as specified for certain uses, the following rates are therefore intended to cover a broad range of conditions.)

| | | Gal. Water/Acre | |
|---------------|-------------|-----------------|--------|
| Crop | | Aircraft | Ground |
| Vegetable and | Field Crops | 1-20 | 5-100 |

RECOMMENDATIONS

(The dosage rates given below are to be incorporated with sufficient water to provide adequate coverage).

COLE CROPS (Broccoli, Brussel Sprouts, Cabbage, Cauliflower): Aphids, Cabbage, Looper, Imported Cabbage Worms, Caterpillars, Army Worms, Cutworms, terminal Diamond Black Moth, Flea Beeties, Learnoppers, Mites, Apply at the rate of 112 to 2 qts, per acre at 7-10 day intervals. Do not apply after idible parts begin to form,

COTTON: For Cutworms (c) apply 1/2 at per acre. For Army Worms, Ficahopper,

Rapid Plant Bug, Southern Stink Bug, Tarnished Plant Bug, Lygus, Aphid, Boll Weevil, Red Spider Mites, Thrips. Apply at the rate of 1 to 1½ qts. per acre. Bollworm and Tobacco Budworm apply at the rate of 1³4-2 qts. per acre at 5 day intervals. Do not feed forage to dairy animals being finished for slaughter. Do not graze animals being finished for slaughter in fields treated late in the season. Workers entering field within 24 hours of application should wear protective clothing. Do not apply within 5 days of hand picking. Do not graze dairy animals or animals being finished for slaughter in fields treated late in the season.

PEPPERS: Aphid, Army Worms, Flea Beetles, Leafhopper, Spider Mites. Apply at the rate of 1 to 11s qts. per acre. Do not apply within 15 days of harvest.

TOMATOES: Aphids, Army Worms, Climbing Cutworms (certain species), Tomato Fruitworm, Cabbage Loopers, Tomato Hornworm, Blister Beetles, Colorado Potato Beetle, Flea Eeetle, Psyllids, Thrips. Leafhoppers, Spider Mites, Russet Mites, Serpentine Leafminer. Apply at the rate of 1-112 qts. per acre. Do not apply within 15 days of harvest.

RICE: Climbing cutworks, Armyworms, grass-hoppers, Rice Stinkbug — Apply 1 qt. per acre. Do not feed treated forage to dairy animals or animals being finished for slaughter. Crayfish, shrimp and crabs will be killed at application rates recommended on this label. Do not use where these are important resources. Do not apply within 15 days of harvest.
