ROOT DESTROYER

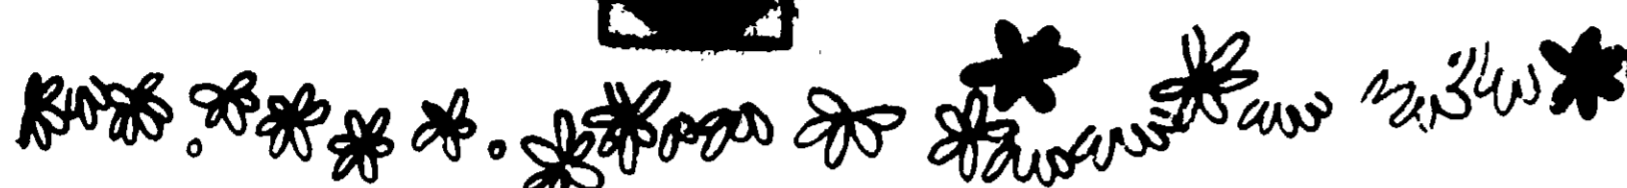

D-ROOT

VIGILANT'S

USD* REG. NO. 6741-3

VIGILANT'S

D-ROOT
 ROOT DESTROYER

septic aide®

Cleans, activates, deodorizes clogged or sluggish septic systems. Prevents back-up, wet, soggy drainfield, bad odors.

drain safe®

An organic, NON-dangerous enzyme-bacteria cleaner for ALL drains — including dishwasher and garbage disposer. SURE! SAFE!

Aqua-Thin®

Speeds up water penetration into septic system drainfield soils and expands the water holding capacity of drainfields.

GREASE-OUT®

An enzyme-bacteria concentrate that liquefies and removes grease from grease traps, sumps, plumbing and sewer lines.

3 IN 1 GLEAM CLEANER T.M.

Newest, easiest way to clean, polish, fog-proof, soil-proof ALL glass.

D-ROOT
 ROOT DESTROYER

WHAT IT IS: D-ROOT™ is 100% active, granular Copper Sulfate Pentahydrate crystals sealed in a slow-dissolving, water-soluble packet for easy, safe handling.

WHAT IT DOES: D-ROOT™ prevents roots in building sewer lines and helps prevent roots in septic system drainfields, in two ways:

1. It paralyzes the drinking mechanism of tree and shrub roots that have penetrated drainfield and building sewer lines.

NOTE: The effect of D-ROOT™ is local; that is, on roots directly exposed to it. D-ROOT™ will not harm or de-vitalize roots outside drainfield or building sewer lines.

2. It discourages entry of roots into drainfield and building sewer lines. Roots do not like water containing copper sulfate.

GUARANTEE

When used as directed, this product must work, or your money will be refunded. For refund, return package, contents and sales slip showing date purchased and where bought, amount paid.

**HARMLESS TO TREES & SHRUBS
 WHEN USED AS DIRECTED**

ACTIVE INGREDIENTS

Copper Sulfate Pentahydrate.....100%

CAUTION

Keep Out of Reach of Children
 Harmful if Swallowed
 NET WT 8 OZ.

IN BUILDING SEWER LINES

When possible, remove clean-out plug and drop the required number of D-ROOT™ packets into line. Flush into lateral with water. If D-ROOT™ cannot be introduced directly into building sewer line, flush required packets, a few at a time, down toilet nearest the line.

Suggested Quantities for Initial Treatment

Size of Line	4"	6"	8"	10"	12"
Packets Required	2	4	6	12	14

Repeat initial treatment weekly for four weeks, or until free-flow is restored; thereafter, each month, use half the number of packets needed for initial treatment.

FOR TREATMENT OF SEPTIC SYSTEM DRAINFIELDS*

The most effective method of application is through the distribution box.

How to Apply: Drop one packet of D-ROOT™ per week for four consecutive weeks into box; thereafter, one or two packets each month.

To stimulate digestion of organic or fibrous waste which may be dislodged from septic tank sewer or drainfield lines by the action of D-ROOT™, supplementary SEPTIC AIDE® treatments are advisable. For each 500-gallon septic tank capacity use two packets of SEPTIC AIDE® every other day during the fifth week following your first use of D-ROOT™. Thereafter make monthly applications of SEPTIC AIDE®, according to directions for its regular use, one week following monthly D-ROOT™ treatments.

*Directions based on 500-gallon tanks and 4-inch lines. Increase quantity of D-ROOT™ and SEPTIC AIDE® proportionately for larger sizes.

DO NOT PUT D-ROOT™ in sink or tub drains, nor allow it to come in contact with chrome surfaces. Corrosion will result.

CLEAN OUT ROOT-CHOKED SEWER LINES with a sewer rod or other suitable mechanical cleaning device before using D-ROOT™ as directed.

DO NOT OVER-TREAT: Because root growths in sewer lines vary greatly, it may be necessary to increase the recommended treatments of D-ROOT™. When this is necessary, use the same recommended amounts, but use them more frequently.

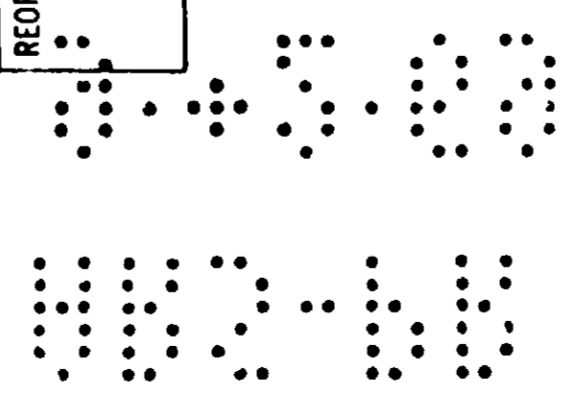

FOR EXAMPLE: One packet twice a week instead of once a week

D-ROOT
 ROOT DESTROYER

INSTRUCTIONS

IN BUILDING SEWER LINES

Remove cleanout plug and drop the required number of D-ROOT™ packets into line. Flush the lateral with water. D-ROOT™ cannot be introduced directly into building sewer. Drop required packets a few at a time down toilet nearest the line.

Suggested Quantities for Initial Treatment

Size of Line	4"	6"	8"	10"	12"
Packets Required	2	4	6	12	14

Repeat initial treatment weekly for four weeks or until freedom is restored, thereafter, each month, use half the number of packets needed for initial treatment.

FOR TREATMENT OF SEPTIC SYSTEM DRAINFIELDS*

The most effective method of application is through the distribution box.

How to Apply: Drop one packet of D-ROOT™ per week for four consecutive weeks into box; thereafter, one or two packets each month.

To stimulate digestion of organic or fibrous waste which may be dislodged from septic tank sewer or drainfield lines by the action of D-ROOT™, supplementary SEPTIC AIDE™ treatments are advisable. For each 500-gallon septic tank capacity use two packets of SEPTIC AIDE™ every other day during the fifth week following your first use of D-ROOT™. Thereafter make monthly applications of SEPTIC AIDE™ according to directions for its regular use one week following monthly D-ROOT™ treatments.

*Directions based on 500-gallon tanks and drain lines of equal quantity of D-ROOT™ and SEPTIC AIDE™ proportionately for larger sizes.

DO NOT PUT D-ROOT™ in sink or tub drains, especially if in contact with chrome surfaces. Corrosion will result.

CLEAN OUT ROOT CHOKED SEWER LINES with a sewer jetting or suitable mechanical cleaning device before using D-ROOT™ as directed.

DO NOT OVER TREAT. Because root growth is slow, it is very important that it may be necessary to increase the recommended quantities of D-ROOT™. When this is necessary use the same recommended amounts, but use them more frequently.

FOR EXAMPLE: one packet twice a week instead of once a week.
