

ORKIN  
RODENT BAIT #3

ORKIN ANTI-COAGULANT RODENT BAIT #3 is a complete ready-to-use bait mixture, prepared expressly for the control of commercial rats and mice.

DIRECTIONS

Place where rats and mice feed, water, or travel . . . or are known to exist . . . and where bait will be protected from children, domestic animals and pets.

For rats, use approximately 1/2 to 1 lb. per 100 sq. ft., preferably in protected bait stations. Maintain uninterrupted supply for at least 10 days.

For mice, place tablespoon amounts of bait at 10 to 20 foot intervals. Maintain uninterrupted supply for at least 10 days.

Keep feeding "stations" well supplied until all signs of feeding have stopped. Do not allow "stations" to remain empty longer than 24 hours, as Orkin Anti-Coagulant Rodent Bait #3 must be consumed daily to be effective. Contaminated or spoiled bait should be replaced promptly.

CONTENTS

ACTIVE INGREDIENTS

3-(4-Acetylphenyl) 4-Hydroxyphenylamine

0.005%

INERT INGREDIENTS

\* Warfarin

0.005%
