

DESCRIPTION

This algicide is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of this algicide tends to stabilize the total chemical treatment system.

This algicide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form this chemical should not come into contact with high concentrations of chlorine. DO NOT MIX THIS ALGICIDE AND CHLORINE TOGETHER when adding to the pool. These chemicals should be handled separately.

This algicide is economical, efficient, stable. It is non-staining in use dilution.

DIRECTIONS

For an initial application use one gallon of this algicide per 25,000 gallons of water. Use one quart per 50,000 gallons of water every third to seventh day depending on weather and use factors.

After each rain of consequence, add one quart per 50,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algal growth is difficult to remove. The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation or swimming activity will assure rapid dispersion.

TO DETERMINE POOL CAPACITY:

Rectangular Pools - Length times width times average depth (in feet) times 7.5 equals gallons.

Round and Oval Pools - Average diameter times average depth (in feet) times 5.9 equals gallons.

# ALGAEICIDE

## A Concentrated Swimming Pool Algicide

ACTIVE INGREDIENT:

Alkyl (C14, 58%; C16, 28%; C12, 14%) dimethyl benzyl ammonium chloride

INERT INGREDIENTS

10%

90%

TOTAL INGREDIENTS 100%

**DANGER:** KEEP OUT OF REACH OF CHILDREN  
(See back panel for additional precautions)

AN EXCLUSIVE PRODUCT OF

**STEARNS CHEMICAL CORPORATION**

HOME OFFICE AND LABORATORY: 318 / 325-4333

2725 DeSIARD STREET, MONROE, LOUISIANA 71201

NEW ORLEANS • BATON ROUGE • SHREVEPORT

PRECAUTIONARY STATEMENTS FOR PRODUCTS PRODUCING LOCAL IRRITATION

DANGER

Keep out of reach of children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food. Rinse empty container thoroughly with water and discard it.

"This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Apply this product only as specified on this label."

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed
